Nordic Sport – the little big company

Nordic Sport is a company from the north of Sweden, which is currently considered one of the world's leading suppliers of athletics equipment. The head office is located in Skellefteå, with branches in Arvidsjaur and Stockholm in Sweden, and in Tallinn, Estonia. Overall, the company has thirty employees.

Börje Österberg is the man behind the company that he founded in 1972. When he bought Sandvik's production of sports products he decided to start investing in athletics equipment. Today our production of Javelins is in Arvidsjaur, Sweden. Something that few people in the world know about is the technology behind production.

Andreas Thorkildsen is one of many athletes who uses the company's cutting-edge Javelins.

Over the years the company has obtained the trust of being a total equipment supplier to many of the major championships, worldwide. Nordic Sport has been a total equipment supplier to the World Athletics Championships in Helsinki in 2008, the European Athletics Championships in Gothenburg in 2006 and the Junior World Championships in Athletics in Bydgoszcz, Poland in 2008, amongst many others.

IAAF certified product.vtt

"The IAAF has a worldwide responsibility to guarantee validity and accuracy of performances and to support any initiative to improve athletic goods. The IAAF Certification System raises the standard in athletics, thus it will help improve the level of competitions", said Primo Nebiolo, the former President of the IAAF.

As one of the world's leading suppliers of track and field equipment, we have to have quality products and provide a wide range. In this chapter you will find materials for booth beginners and top-level athletes – everything from our produced javelins and vault poles to our high jump pits and throwing cages.

Track & Field

Javelins

There is a Nordic Sport javelin for every thrower

Nordic javelins is a hallmark among competitive sportsmen and organizers all over the world. The famous Swedish javelins were first manufactured from thin-walled steel tubing by Seefab, Sandviken, more than 50 years ago, and have since then earned worldwide fame. In 1973 Nordic Sport took over the production.

A wide range of top achievements have been made with Nordic javelins; Numerous Olympic medals, World Championships medals and World records. The result achieved by a javelin thrower depend of course on his

competence. The materials and the construction of his javelin, however, are of the utmost importance.

As a result of unique know-how and intensive research, the quality of the Nordic javelin has continuously been improved. We are determined to maintain this development.

Nordic javelins have won more championship medals and beaten more records than any other javelin in the world. Nordic Sport presents a wide range of javelins. All manufactured with the famous Nordic finish and Nordic quality.

Nordic Sport establishes flex chart javelin range!

To indicate that a javelin is made for certain distance feels, after the rule changes that came into effect from 1986 onwards anachronistic. Nordic Sport have gradually left the old way of thinking and most of our models do not have now the old meters designation. We are now introducing a completely new system, taking into account the javelins stiffness degree in combination with other aerodynamic factors. Stiffness and other aerodynamic factors become more important the higher the speed of release of a javelin is. Speed of release, coupled with appropriate angles of release and clean hit of the spear, is dependent on the individual athlete's physical capabilities, technical skill and sense of equipment. **The lower flex a javelin has, the greater requirement for throwers both technical and physical ability.**

Javelin with flex 6.0 or lower is recommended only for skilled throwers with capacity over 70 (men) and 50 (women) meters, but significant benefits with these javelins is only visible when technically pure throws of 80 and 60 meters is achieved. Javelin with flex 6.1 to 8.0 is slightly more forgiving, but you can throw very far. At flex 8.1 to 10.0, the javelin designed so that they will land with the tip first clear even at moderate throws. These are best suited for example for Decathlon throwers, who do not have javelin as one of its main disciplines. Javelin with flex 10.1 and higher is recommended only as beginner javelin and for volume throwing in training!

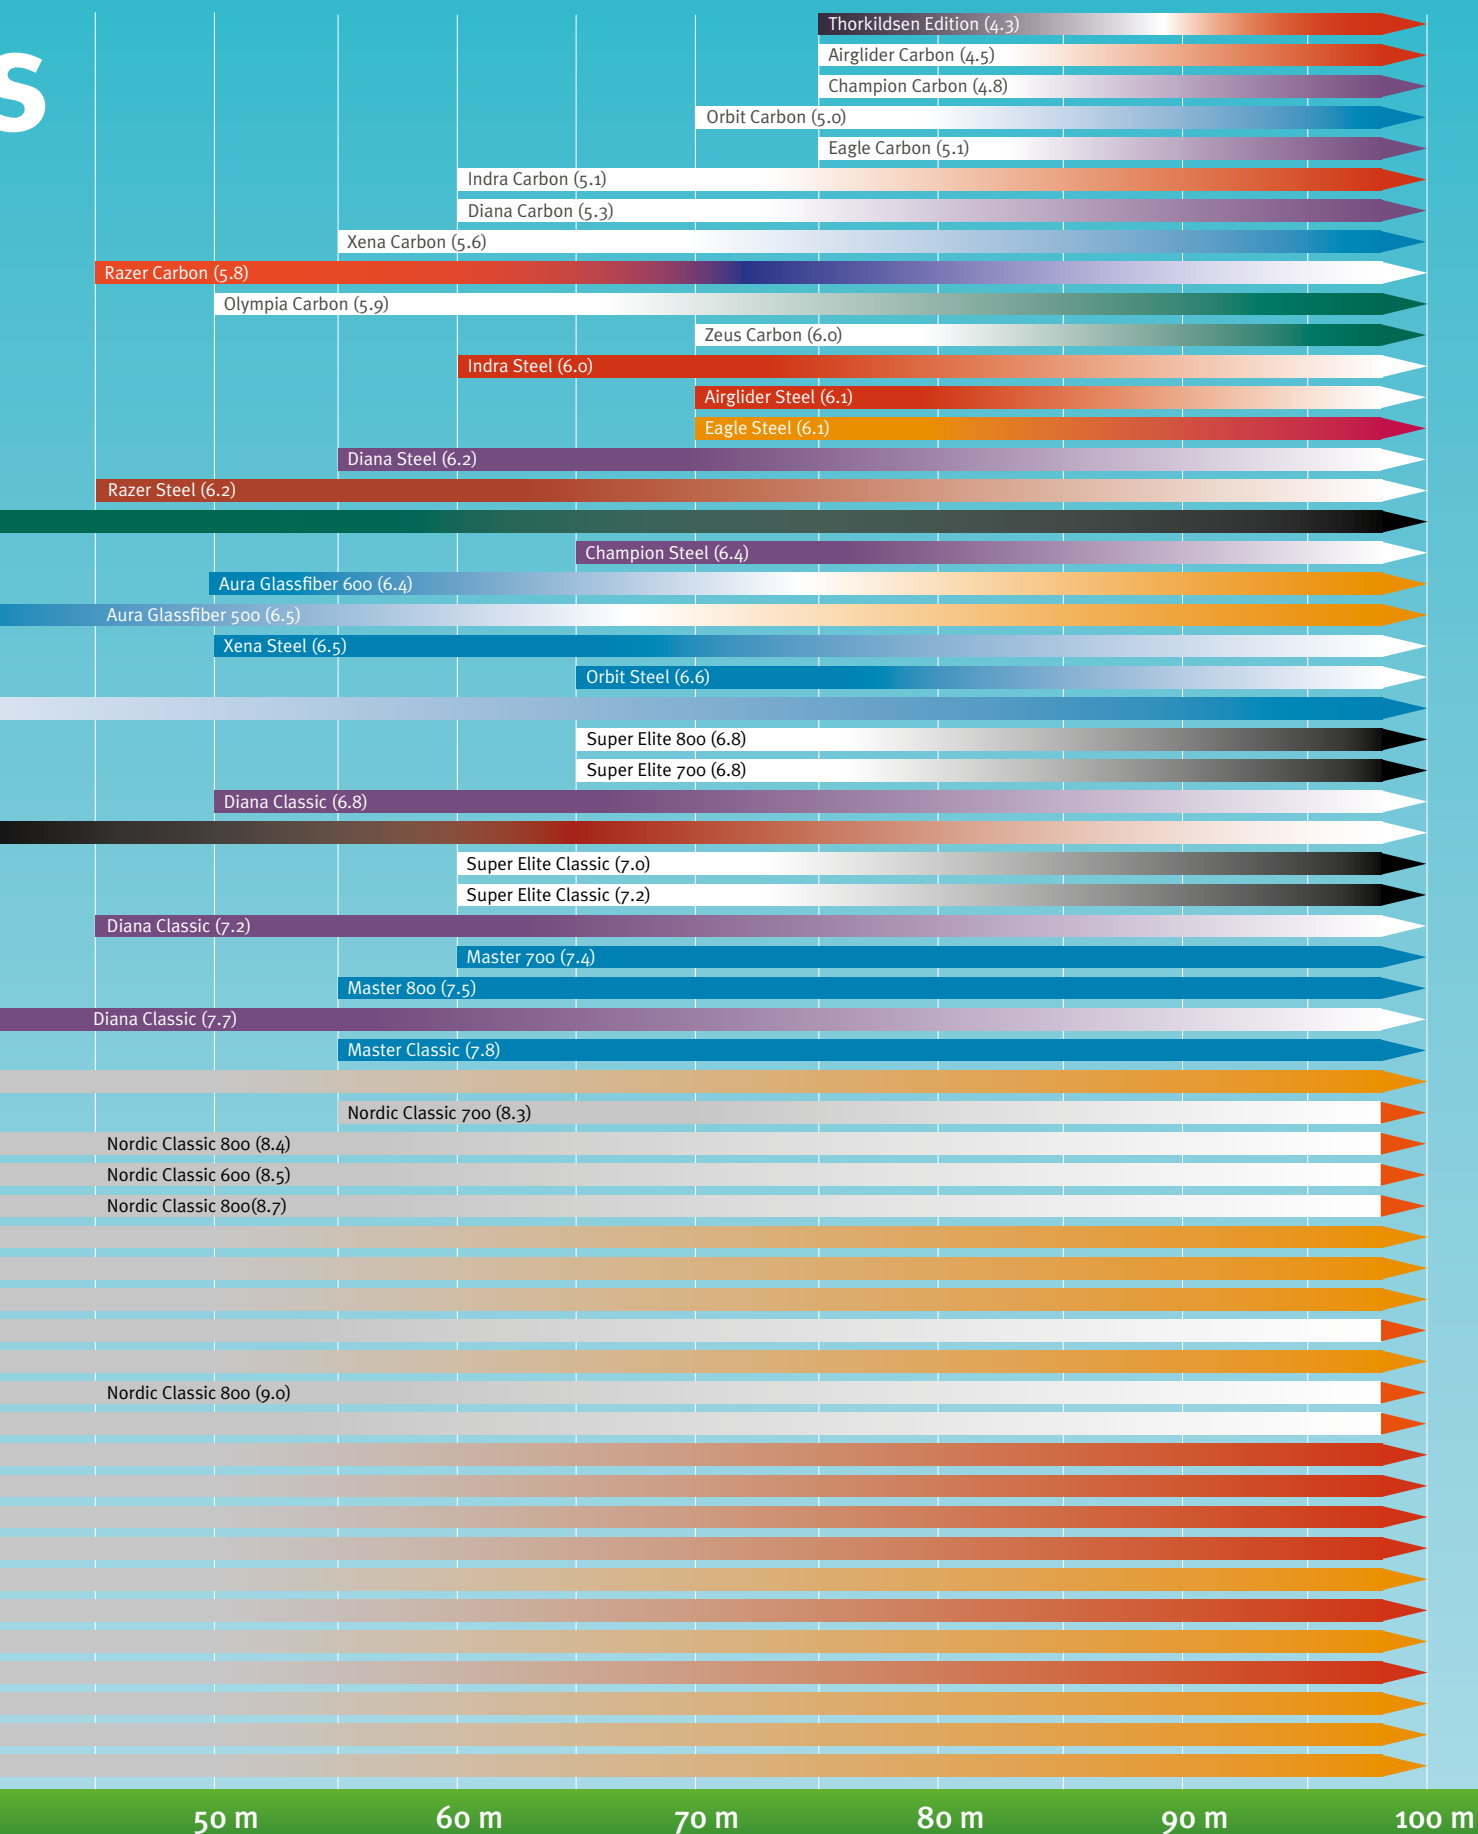

Javelin made of carbon fiber is typically our most rigid javelins, and therefore most demanding, but also those of a really talented throwers gives it maximum potential. Javelin made of steel is a bit more forgiving than carbon fiber javelin. Javelin, made of fiberglass fits only 600 g javelins or lighter and shows the characteristics that are relatively close carbon fiber javelin, but is slightly more forgiving.

Carbon Fiber Javelin 800g

Our most advanced javelins made of carbon fiber and come in four varieties of extremely high requirements! Actual javelins shaft has the same shape, but the models have different stiffness ratio and tip.

Thorkildsen Edition

1. Javelin Thorkildsen Edition

Competition javelin of carbon that is developed by the Norwegian javelin thrower Andreas Thorkildsen. The javelins is a further improvement of our Nordic Airglider carbon and is suitable for all type of wind conditions. It is a very stiff javelin and it should only be used by throwers with very high capacity both physical and technical. Flex 4.3. IAAF certified no I-12-0596

art 7916807c

2. Airglider Carbon flex 4.5

All-round javelin that is suitable for all conditions, but requiring very high capacity, both physically and technically in the thrower. Flex 4.5

art 7916803c

3. Champion Carbon flex 4.8

The javelin is primarily designed for headwind throws. Requires high capacity, both physically and technically in the thrower. Flex 4.8

art 7916800C

4. Orbit Carbon flex 5.0

The javelin is primarily designed for tailwind throws. Requires high capacity, both physically and technically in the thrower. Flex 5.0

art 7916808C.

5. Zeus Carbon flex 6.0

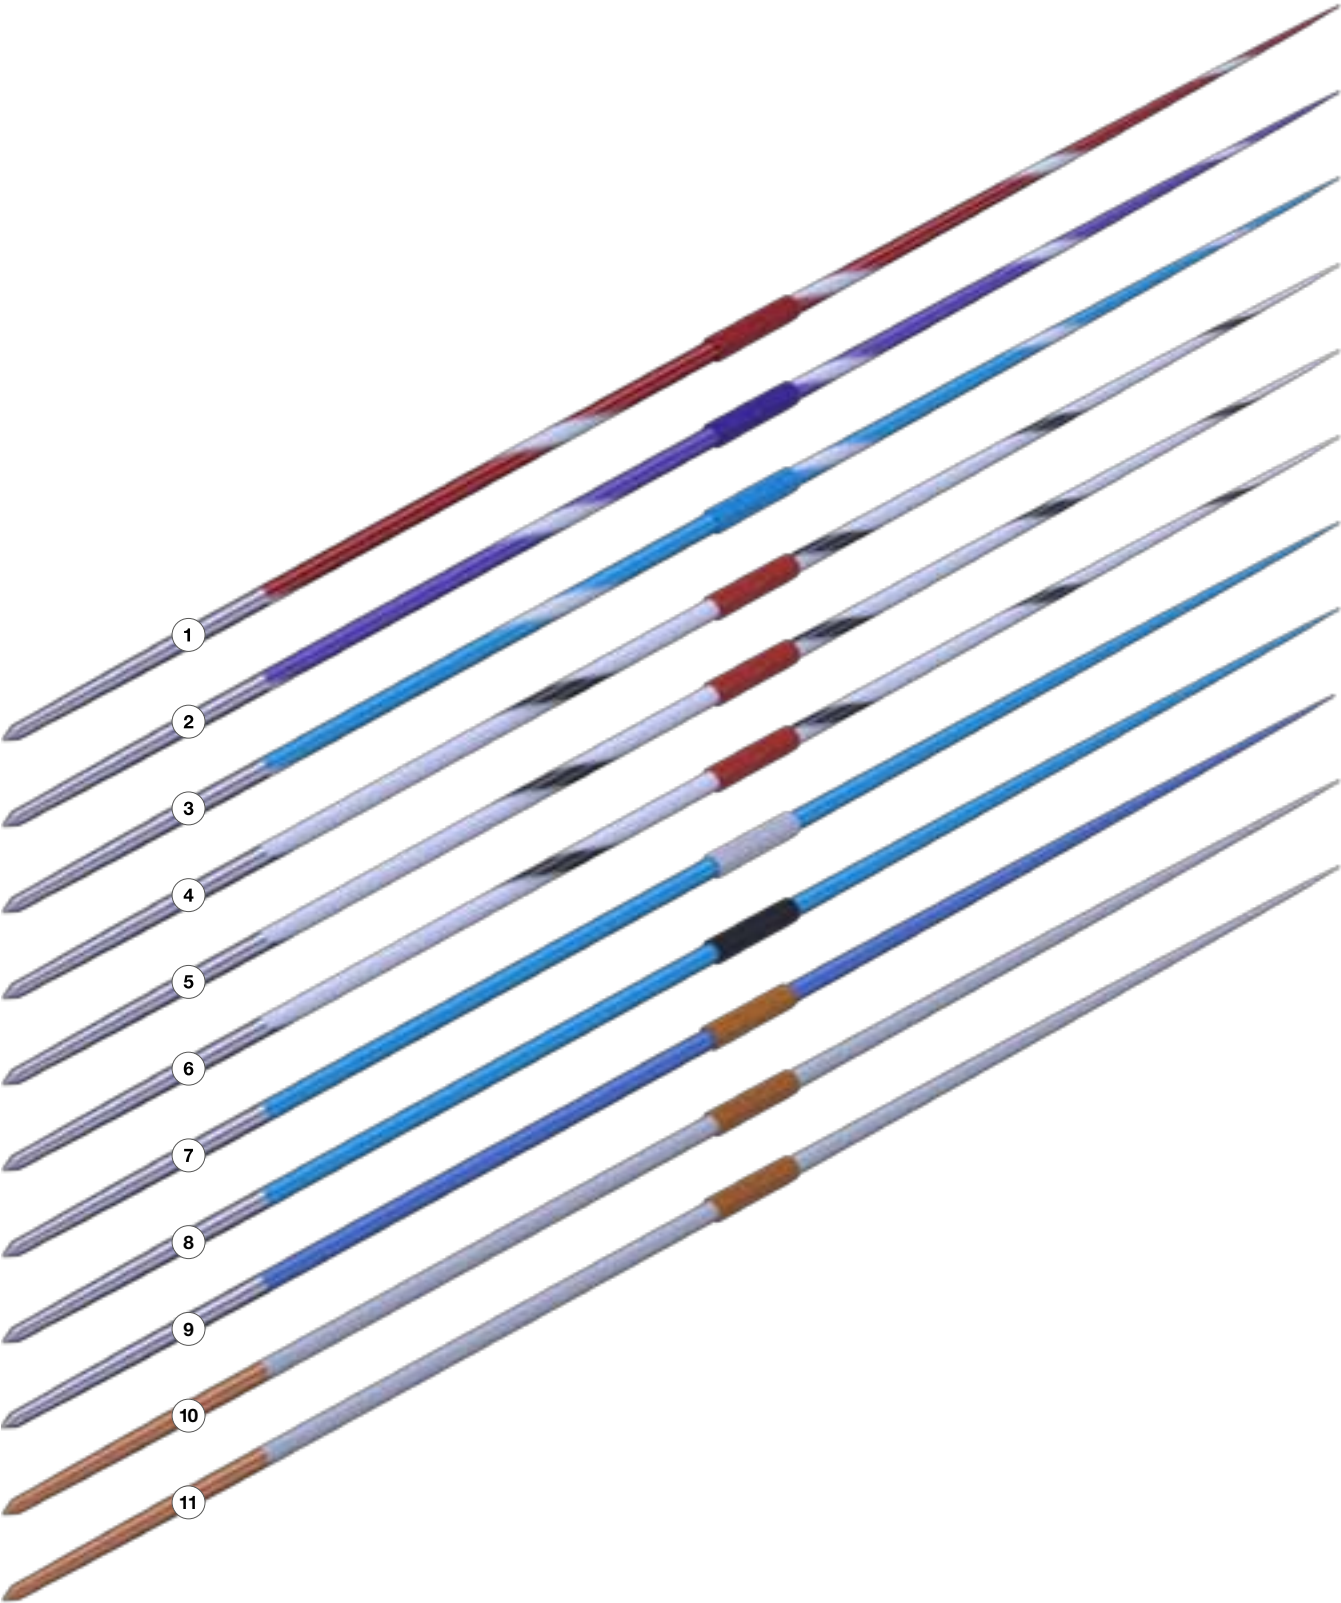

All-round javelin that is suitable for all conditions - softer and therefore more forgiving than Airglider carbon - the equivalent ponderous! Require relatively high capacity, both physically and technically in the thrower. Flex 6.0

art 7969600c

Steel Javelin 800g

Our most advanced steel javelins are produced in three variants for very high requirements! The actual javelin body has the same shape, but the models have different tip and slightly different stiffness ratio. The most advanced steel models, the exact same form as their counterparts carbon fiber javelin.

1. Airglider Steel flex 6.1

All-round javelin that is suitable for all conditions. Softer than equivalent carbon model. Requires very good capacity both technically and physically with the thrower. Flex 6.1

art 7916803

5. Super Elite Classic flex 7.0

The javelin is primarily designed for tailwind throws. Requires good capacity both technically and physically with the thrower. Flex 7.0

art 7916802

9. Master Classic Alu flex 7.8

All-round javelin that is suitable for all conditions. Requires some capacity, both technically and physically with the thrower. Flex 7.8

art 7912800A

2. Champion Steel flex 6.4

The javelin is primarily designed for headwind throws. Softer than equivalent carbon model. Requires good capacity both technically and physically with the thrower. Flex 6.4

art 7916800

6. Super Elite Classic flex 7.2

The javelin is primarily designed for headwind throws. Requires good capacity both technically and physically with the thrower. Flex 7.2

art 7916804

10. Nordic Classic 800 flex 8.4

Javelin suitable for beginners as well decathlon throwers who do not have javelin as best event. Lands usually with the tip first from 40 meters. Flex 8.4

art 7969601

3. Orbit Steel flex 6.6

The javelin is primarily designed for tailwind throws. Softer than equivalent carbon model. Requires good capacity both technically and physically with the thrower. Flex 6.6

art 7916808

7. Master 800 flex 7.5

All-round javelin that is suitable for all conditions. Requires some capacity, both technically and physically with the thrower. Flex 7.5

art 7913800

11. Nordic Classic 800 flex 8.7

Javelin suitable for beginners as well decathlon throwers who do not have javelin as best event. Lands usually with the tip first from 35 meters. Flex 8.7

art 7969602

4. Super Elite 800 flex 6.8

All-round javelin that is suitable for all conditions. Requires good capacity both technically and physically with the thrower. Flex 6.8

art 7916801

8. Master Classic flex 7.8

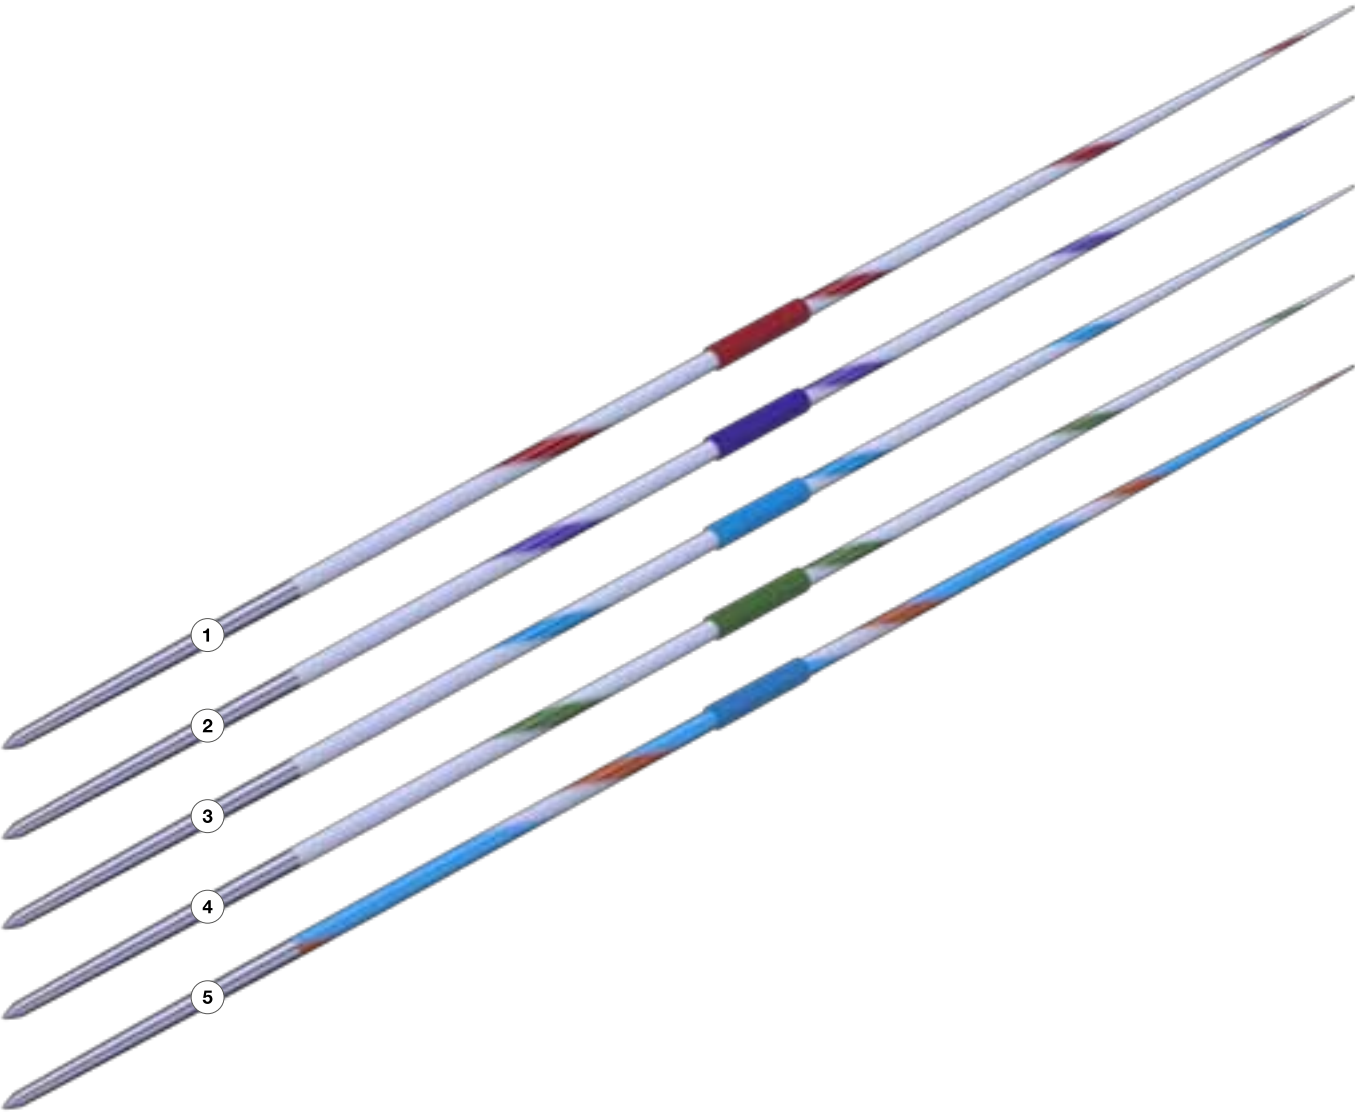

The javelin is primarily designed for headwind throws. Requires some capacity, both technically and physically with the thrower. Flex 7.8

art 7912800

Carbon and Glass Fiber Javelin 600g

Our most advanced javelin made of carbon fiber and come in four variants, and a model in fiberglass for extremely high requirements! The actual javelin body has the same shape, but the models have different stiffness ratio and tip.

1. Indra Carbon flex 5.1 
All-round Javelin that is suitable for all conditions, but requiring very high capacity, both physically and technically in the thrower. Flex 5.1
art 7917605c

2. Diana Carbon flex 5.3 
The javelin is primarily designed for headwind throws. Requires high capacity, both physically and technically in the thrower. Flex 5.3
art 7917603C

3. Xena Carbon flex 5.6 
The javelin is primarily designed for tailwind throws. Requires high capacity, both physically and technically in the thrower. Flex 5.6
art 7917604c

4. Olympia Carbon flex 5.9 
All-round javelin that is suitable for all conditions - softer and therefore more forgiving than Diana carbon - the equivalent ponderous! Require relatively high capacity, both physically and technically in the thrower. Flex 5.9
art 7917606c

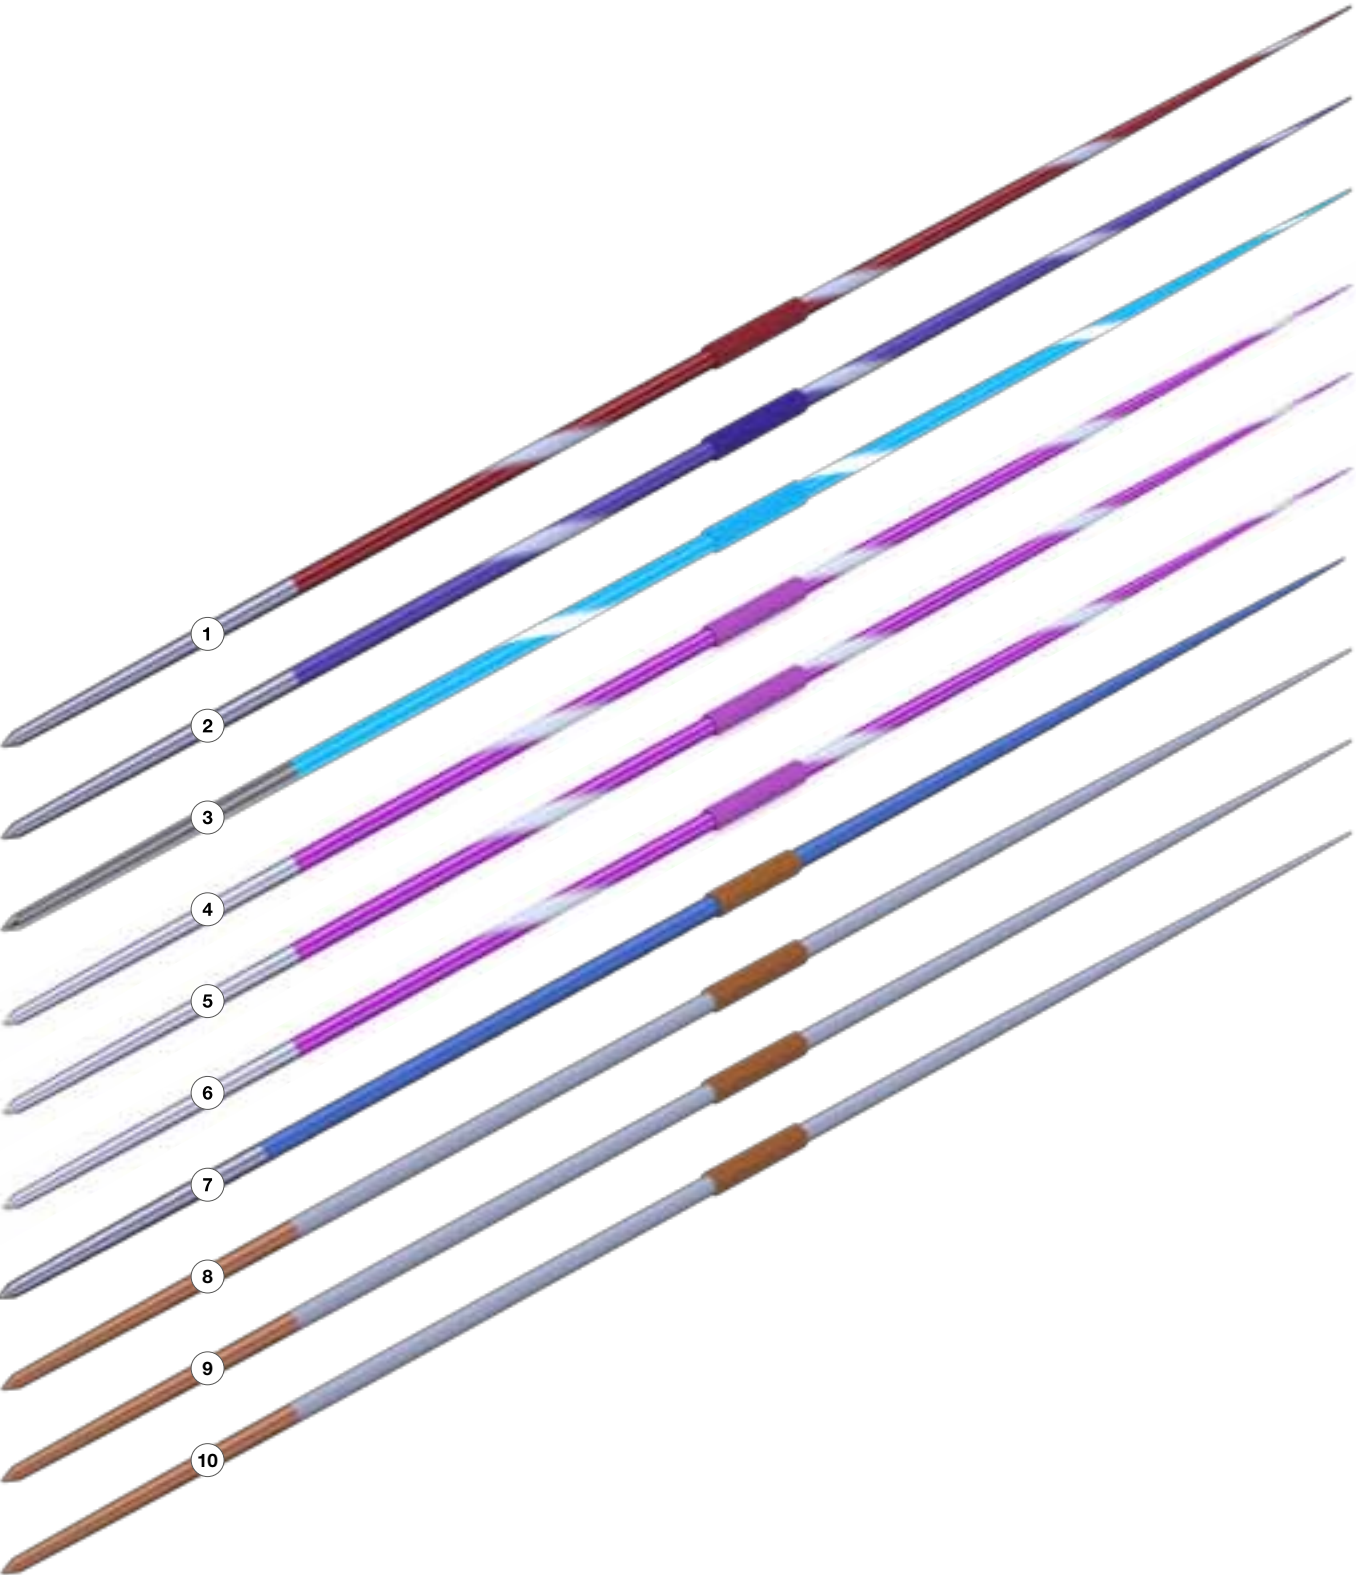

5. Aura Fiber glas flex 6.4 
All-round javelin that is suitable for all conditions. Fiberglass characteristics make it a little softer than carbon. Require relatively high capacity, both physically and technically of the thrower. Flex 6.4
art 7918600

Olympia Carbon flex 5,9

Steel Javelin 600g

Our most advanced steel javelin are produced in three variations for very high requirements! The actual javelin body has the same shape, but the models have different tip and slightly different stiffness ratio. The most advanced steel models, the exact same design as their counterparts carbon fiber javelin. In addition to these, we have three models each in both the Diana and Nordic Classics.

1. Indra Steel flex 6.0

All-round javelin that is suitable for all conditions. Softer than equivalent carbon model. Requires very good capacity both technically and physically with the thrower. Flex 6.0

art 7917605

5. Diana Classic flex 7.2

All-round javelin that is suitable for all conditions. Requires good capacity both technically and physically with the thrower. Flex 7.2

art 7917601

8. Nordic Classic 600 flex

8.5

Javelin suitable for beginners as well decathlon throwers who do not have javelin as best event. Lands usually with the tip first from 35 meters. Flex 8.5

art 7915600

2. Diana Steel flex 6.2

The javelin is primarily designed for headwind throws. Softer than equivalent carbon model. Requires good capacity both technically and physically with the thrower. Flex 6.2

art 7917603

6. Diana Classic flex 7.7

The javelin is primarily designed for headwind throws. Requires good capacity both technically and physically with the thrower. Flex 7.7

art 7917602

9. Nordic Classic 600 flex 8.8

Javelin suitable for beginners as well decathlon throwers who do not have javelin as best event. Lands usually with the tip first from 30 meters. Flex 8.8

art 7915601

3. Xena Steel flex 6.5

The javelin is primarily designed for tailwind throws. Requires high capacity, both physically and technically in the thrower. Flex 6.5

art 7917604

7. Master Alu 600 flex 7.9

All-round javelin that is suitable for all conditions. Requires good capacity both technically and physically with the thrower. Flex 7.9

art 7917600A

10. Nordic Classic 600 flex 9.2

Javelin suitable for beginners as well decathlon throwers who do not have javelin as best event. Lands usually with the tip first from 25 meters. Flex 9.2

art 7915602

4. Diana Classic flex 6.8

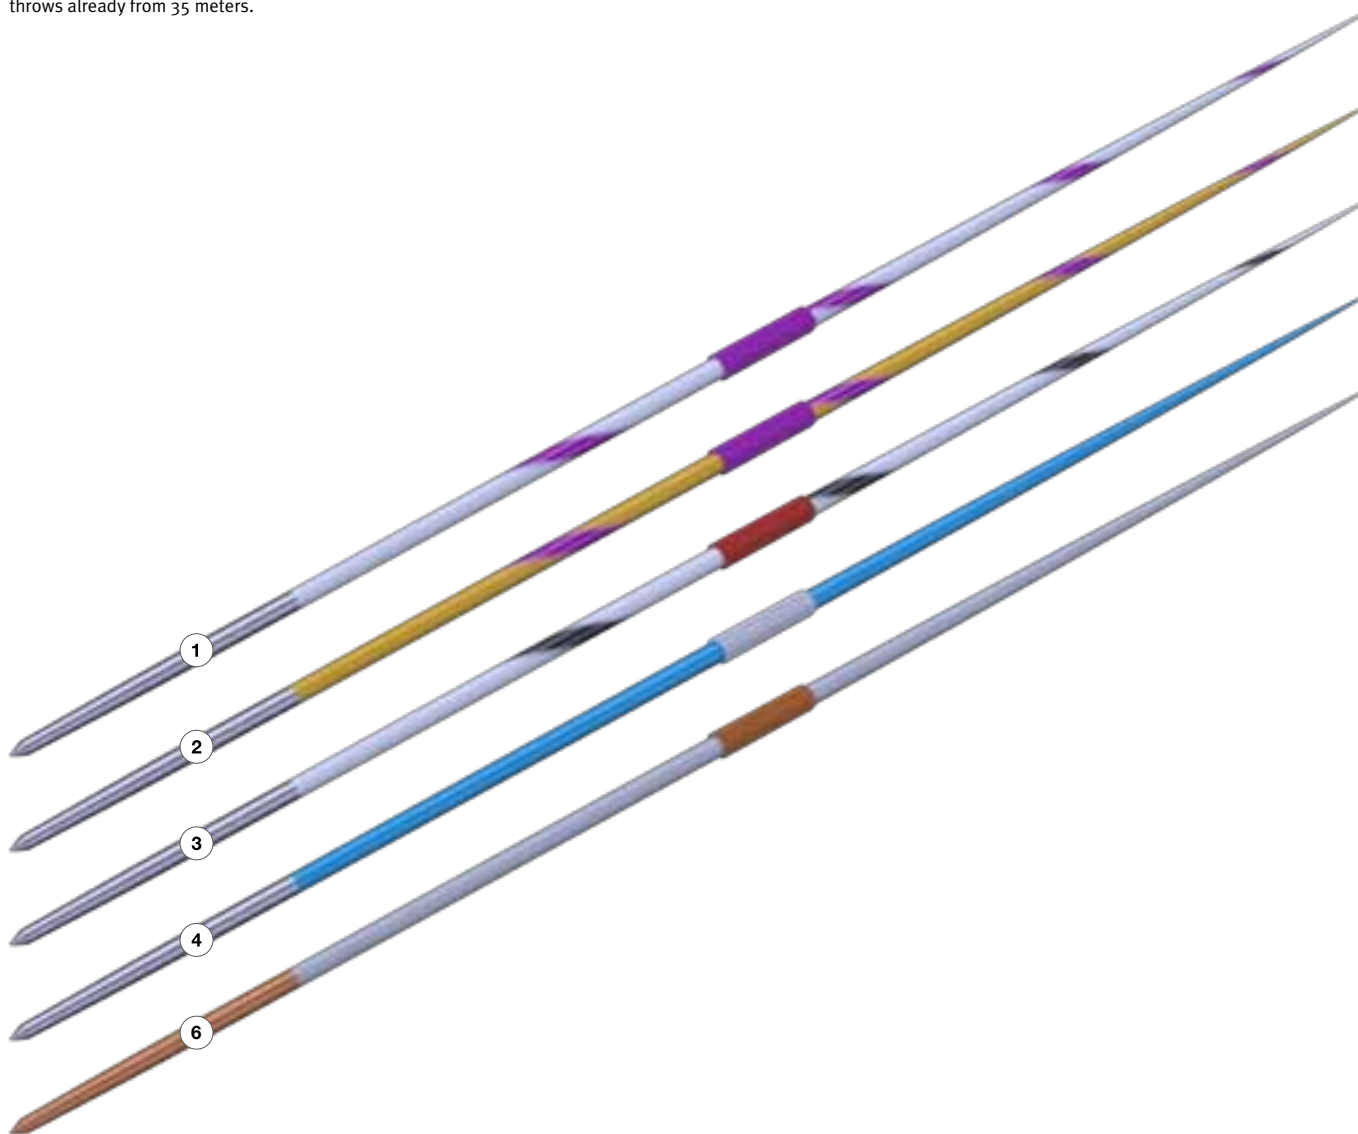

The javelin is primarily designed for tailwind throws. Requires good capacity both technically and physically with the thrower. Flex 6.8

art 7917600

Competition Javelin 700g

Our top model, the Eagle, manufactured both in carbon fiber and steel. In order to benefit from Eagles advanced aerodynamic properties are required that the thrower has a capacity of over 70 meters! Our steel javelins has a good spread on the flex rate, making that the highest, Nordic Classic 700, usually provide safe landings with the tip first at throws already from 35 meters.

1. Eagle Carbon flex 5.1

All-round Javelin that is suitable for all conditions, but requiring very high capacity, both physically and technically in the thrower. Flex 5.1

art 7914705c

3. Super Elite 700 flex 6.8

All-round javelin that is suitable for all conditions. Requires good capacity both technically and physically with the thrower. Flex 6.8

art 7914703

5. Javelin Rapid 700g

All-round javelin that is suitable for all conditions. A good competition javelin of "Master-class" with flex 7.2.

art 7914703R

2. Eagle flex 6.1

All-round javelin that is suitable for all conditions. Softer than equivalent carbon model. Requires very good capacity both technically and physically with the thrower. Flex 6.1

art 7914705

4. Master 700 flex 7.4

A "forgiving" all-round javelin suitable for all conditions, and that requires moderate capacity, both physically and technically by the thrower. Flex 7.4

art 7914706

6. Nordic Classic 700 flex 8.3

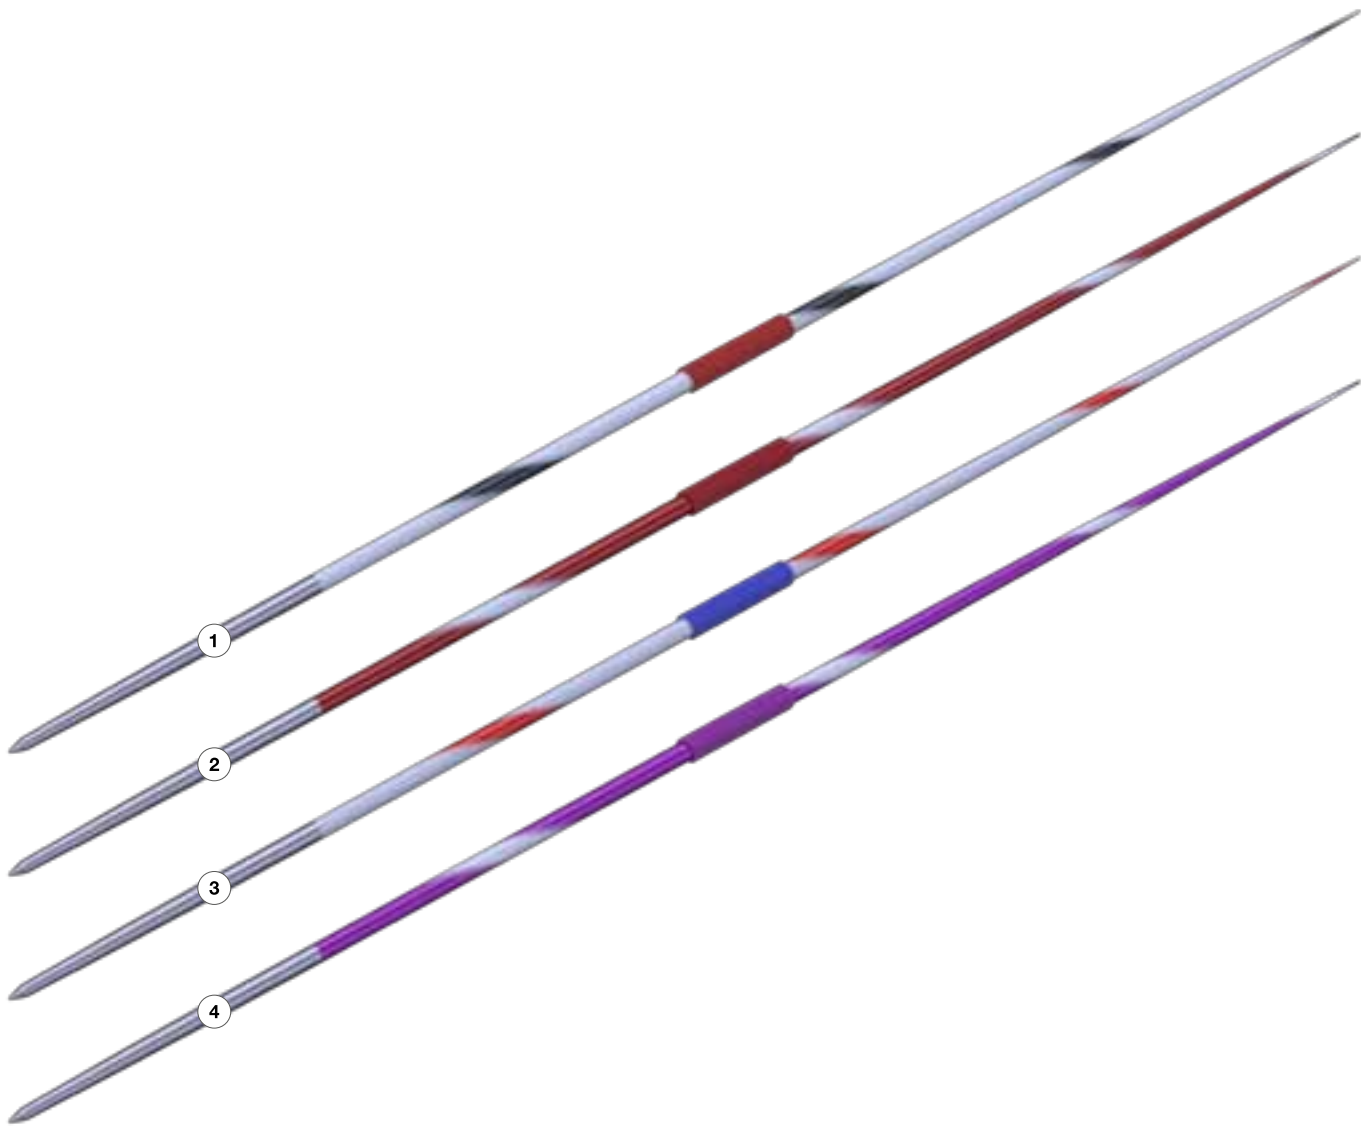

Javelin suitable for beginners as well as decathlon throwers who do not have javelin as best event. Lands usually with the tip first from 35 meters. Flex 8.3

art 7914707

Competition Javelin 400g and 500g

Those models of our 500 and 400 g javelin which is recommended for use in competition, like our top models in other weights, equipped with the classic Nordic-helix. These competition models are primarily intended for those who have left the pure beginner stage and have come a long way in their throwing!

1. Super Elite 500 flex 6.9

All-round javelin that is suitable for all conditions. Requires good capacity both technically and physically with the thrower. Flex 6.9

art 7914704

2. Razer Steel 500 flex 6.2

All-round javelin that is suitable for all conditions. Requires good capacity both technically and physically with the thrower. Flex 6.2

art 7916500

3. Razer Carbon 500 flex 5.8

All-round Javelin that is suitable for all conditions, but requiring very high capacity, both physically and technically in the thrower. Flex 5.8

art 7916500c

4. Rocket Steel 400 flex 6.3

All-round javelin that is suitable for all conditions. Requires good capacity both technically and physically with the thrower. Flex 6.8

art 7916400

Viking Steel

Our classic, robust training javelin come in all weights from 900 down to 400 grams in the budget price range. Viking javelins is primarily intended for beginners, who can use this model both for training at the competition since both the 800 g, 700 g and 600 g models are IAAF certified. For more advanced throwers Viking is best suited to throwing in volume training and for training with "overweight" implements (ie throw with javelins that are heavier than the thrower normally use in competitions)

Viking 900 flex 10.4

Training for the Javelin throws with overweight javelins. Flex 10.4

art 7920900

Viking 700 flex 10.7

Beginners and training javelin. Can also be used as a competition javelin and is recommended for the throwers with the capacity of 20-35 meters. Flex 10.7

art 7924700.

Viking 800 flex 10.4

Beginners and training javelin. Can also be used as a competition javelin and is recommended for the throwers with the capacity of 25-40 meters. Flex 10.4

art 7922800

Viking 600 flex 11.1

Beginners and training javelin. Can also be used as a competition javelin and is recommended for the throwers with the capacity of 15-25 meters. Flex 11.1

art 7925600

Viking 500 flex 11.6

Beginner and training javelin. Flex 11.6

art 7925500

Viking 400 flex 11.9

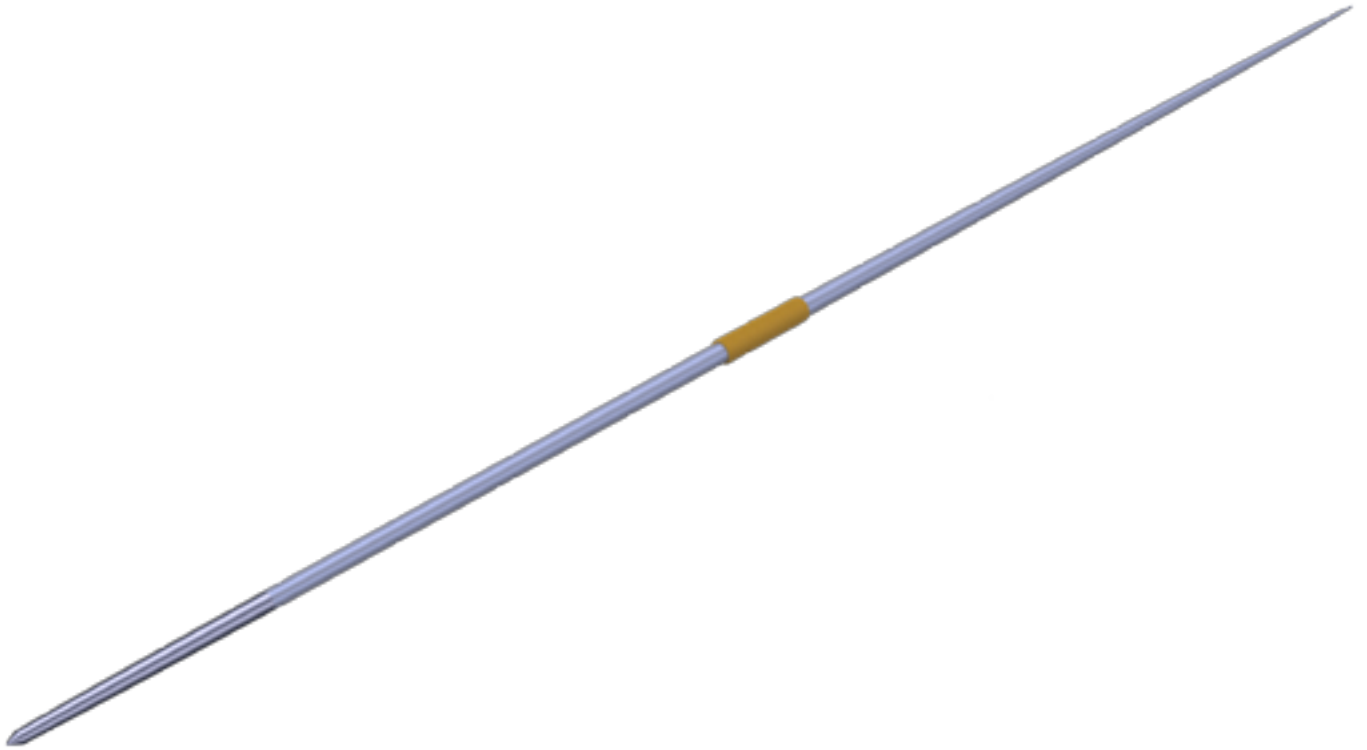

Beginner and training javelin. Flex 11.9

art 7926400

Comet Aluminum Training Javelin

A soft and very forgiving pure training javelin in the low-price range! Gentle in volume throwing.

Comet Alu 800 flex 11.4

Simple beginner and training javelin. Flex 11.4

art 7961800

Comet Alu 600 flex 12.1

Simple beginner and training javelin. Flex 12.1

art 7961600

Comet Alu 400 flex 12.9

Simple beginner and training javelin. Flex 12.9

art 7961400

Comet Alu 700 flex 11.7

Simple beginner and training javelin. Flex 11.7

art 7961700

Comet Alu 500 flex 12.6

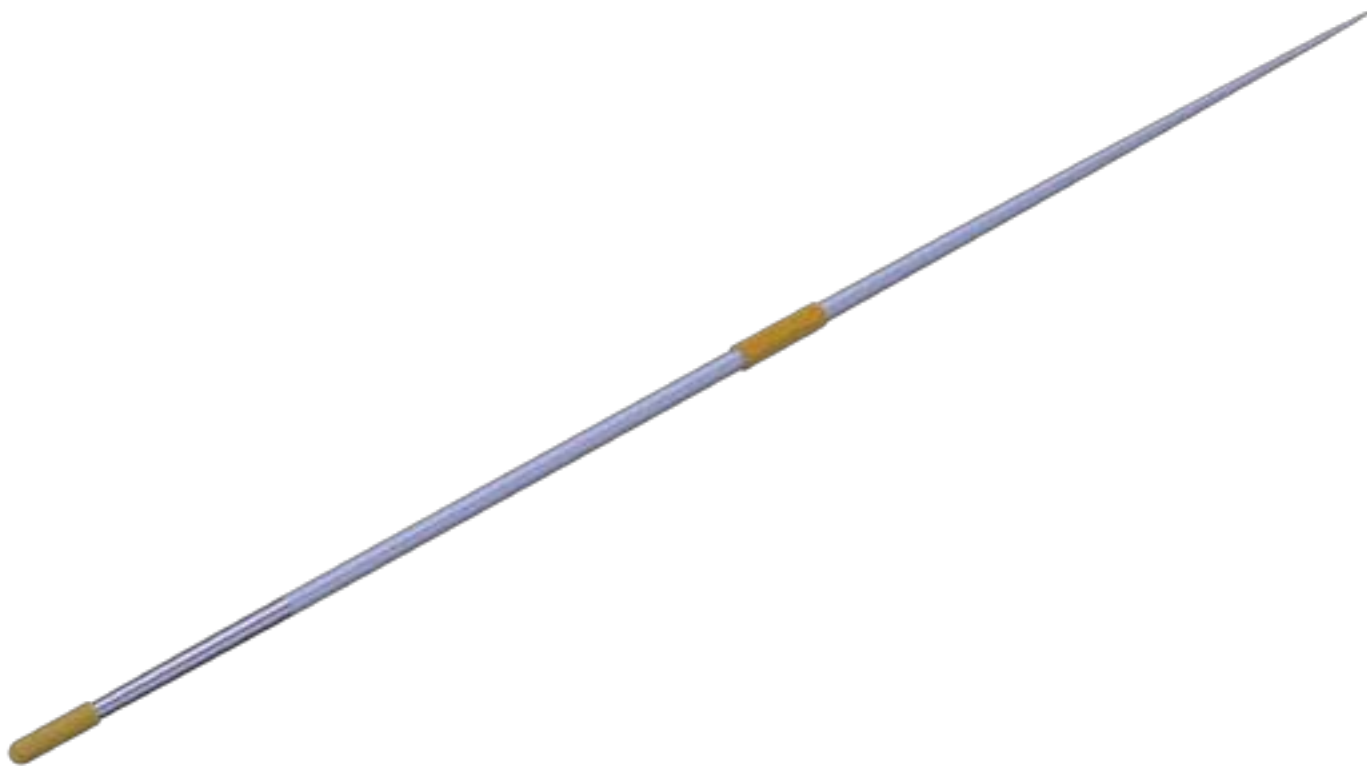

Simple beginner and training javelin. Flex 12.6

art 7961500

Classic Rubber Tip Javelin

A very forgiving pure training javelin! Gentle in volume throwing indoors and on artificial turf.

1. Classic Alu RT 800 g

Javelin suitable for beginners as well professional throwers for training purpose indoors and on artificial grass. Flex 8.7
art 7968800

3. Classic Alu RT 600 g

Javelin suitable for beginners as well professional throwers for training purpose indoors and on artificial grass. Flex 8.8
art 7968600

5. Classic Alu RT 400 g

Javelin suitable for beginners as well professional throwers for training purpose indoors and on artificial grass. Flex 8.9
art 7968400

2. Classic Alu RT 700 g

Javelin suitable for beginners as well professional throwers for training purpose indoors and on artificial grass. Flex 8.3
art 7968700

4. Classic Alu RT 500 g

Javelin suitable for beginners as well professional throwers for training purpose indoors and on artificial grass. Flex 8.8
art 7968500

Youth Javelin

Nordic Fly-Hi Javelin

Made of aluminium with tip and tail of plastic which are blunt in order to eliminate risk of injury. Cotton cord. Weight 270 g. Length 115 cm. Suited for children between 4-10 years.

art 7900030

Vortex Mini

Made of 2 mm white http, 90x60x40x50 cm.

art 7900022

Turbo javelin

For training outdoor and indoor. Made of strong polyurethane. Soft tip can be equipped. Weight approx 1.0 kg.

art 7965000

Vortex Maxi

art 7900020

Accessories

Javelin Bag Elite 800

Made of the strongest and toughest textile material in the world, Cordura®, used by military forces around the world.

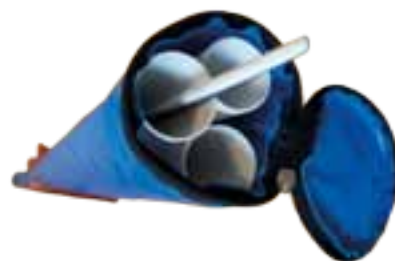

Fill inside with strong Ø140mm PE pipe with 5mm thick walls, give your javelins the best protection. Fits maximum 7 javelins.

art 7900032

Javelin Bag Elite 600

art 7900034

Javelin bag 800 hard

Javelin bag of soft, but strong PVC material with three plastic pipes. Water resistant with place for 3 javelins.

art 7900029

Javelin bag 600 hard

art 7900031

Javelin Bag 800

Javelin bag of soft, but strong PVC material. Water resistant with place for 5-7 javelins.

art 7900027

Javelin Bag 600

art 7900028

Flight case

Rigid stainless steel frame javelin case. Made in mind for athletes to travel a lot. Up to 5 javelins

art 7900025

Poles

Nordic Sport manufactures and develops poles that are special and unique! Our poles are hand crafted. Our service and speed is recognized and respected around the world.

Nordic is the only pole manufacturer in the world that offer you, as a customer, direct contact with our pole experts and engineers. We always listen to your ideas and suggestions, in order to improve our poles even more.

If you have any queries, please contact Lars Forsberg.

Nordic Evolution

Nordic Sport has developed a new pole, which is manufactured of a unique and secret mixture of material. The mixture is completely different from all other poles on the market. The Evolution pole has been tested thoroughly with help of both national

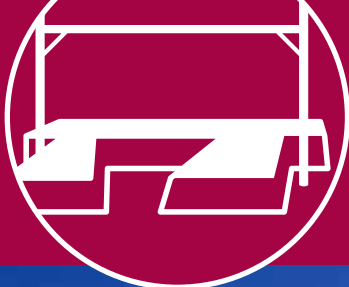

and international elite vaulters with very impressive results. Tests show:

- Lighter than afberglass pole
- Smaller in diameter than a fiberglass pole
- Bends easy at the beginning of the vault
- Gives a powerful kick-back at final stage of the vault

Pole vault

Electronic PV Standard

World's most modern electronic foldable pole vault standard made 100% of aluminum. The crossbar holder is controlled by a computer, iPhone or iPad and a driving belt of armoured nylon material by electric motor. Inside the profile a measuring tape runs that continuously shows the exact height of the bar at eye level. The stable base can be moved laterally and the standard is easily dismantled to allow change of jump site. Foldable at 80 cm height in any direction. Height from 150 to 635 cm. IAAF certified
art 3106299

PV Standards Elite

World's most modern 360° foldable pole vault standard made 100% of aluminum. The crossbar holder is controlled by a crank and a driving belt of armoured nylon material. Inside the profile a measuring tape runs that continuously shows the exact height of the bar at eye level. The stable base can be moved laterally and the standard is easily dismantled to allow change of jump site. Foldable at 80 cm height in any direction. Height from 150 to 635 cm. IAAF Certified

End Cap Anti-Roll

art 2126422

Anti-roll PV Crossbar

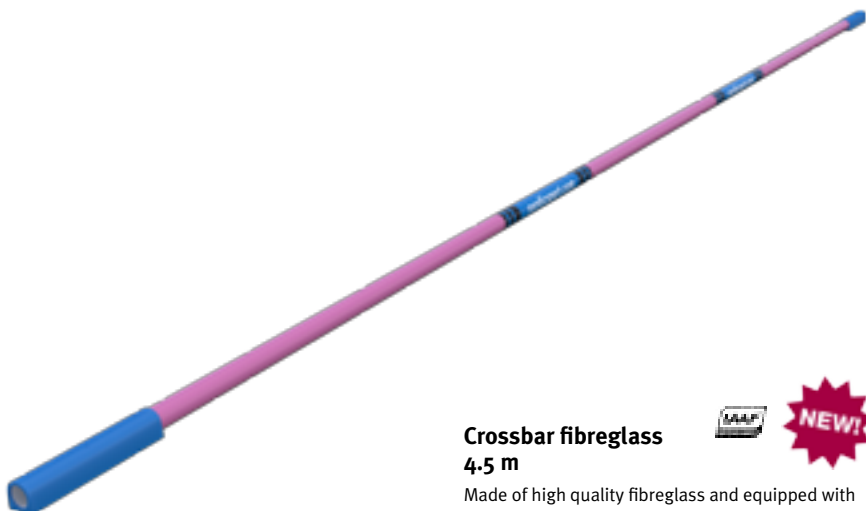

Our new IAAF certified 4,5 m fiberglass crossbar with new groundbreaking anti-rolling ends. The crossbar ends are in half circle shape. The ends lower the center of gravity point, that makes the crossbar much more stable and more or less impossible to roll on the crossbar holder. We have also made the fiberglass tube heavier than standard crossbars available on the market.

art 2126421

Protection Pads for PV base

Protects the vaulter and pole from hitting the base of the PV standards. With a frame to fit the base and top. Padding covered with PVC on upper side.

art 3106213

Crossbar fibreglass 4-5 m

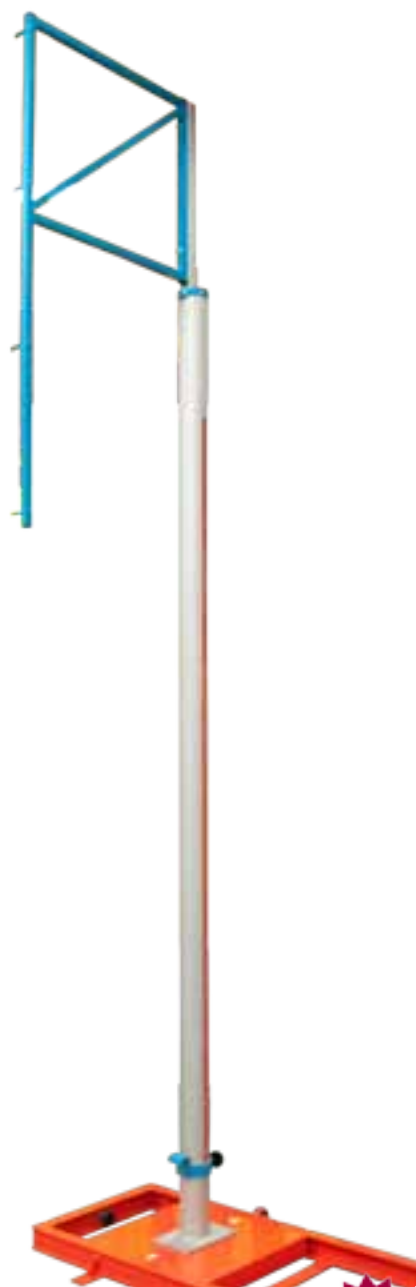

Made of high quality fibreglass and equipped with approved end pieces according to new IAAF rules. Length 4-5 m. IAAF certified no E-99-0193.

art 1126410

Waterjump steeplechase hurdle

Under structure of powder coated steel with hurdle bar of strong wood. For concrete embedment. Length 366 cm. Adjustable height. IAAF certified no E-03-0366.

art 1126430

Used at

Hurdle cart 10

Hurdle cart of galvanized steel profile. Takes approx 10 hurdles.

art 1126450

Used at

Steeplechase hurdle 3.96 m

With strong laminated wood hurdle crossbar. Under structure of powder coated steel with hurdle bar of strong wood. Length 396 cm. Adjustable height. IAAF certified no E-99-0009.

art 1126429

Wheels for Steeplechase

Set of 4 pcs wheels for steeplechase.

art 1126439

Tilt hurdle small (40-60 cm)

Practise hurdle in three different heights. The hurdle returns automatically to upright position after being knocked down.

art 1127020S

Tilt hurdle medium (55-84 cm)

art 1127021Sv

Tilt Hurdle large (66-106 cm)

art 1127022S

Steeplechase hurdle 5.0 m

With strong laminated wood hurdle crossbar. Under structure of powder coated steel with hurdle bar of strong wood. Length 500 cm. Adjustable height.

art 1126432

Used at

Hurdles trolley 40

Our new back loaded hurdles trolley in steel with space for 40 nests. Our hurdle trolley equipped with swivel front wheels and hook the golf cart.

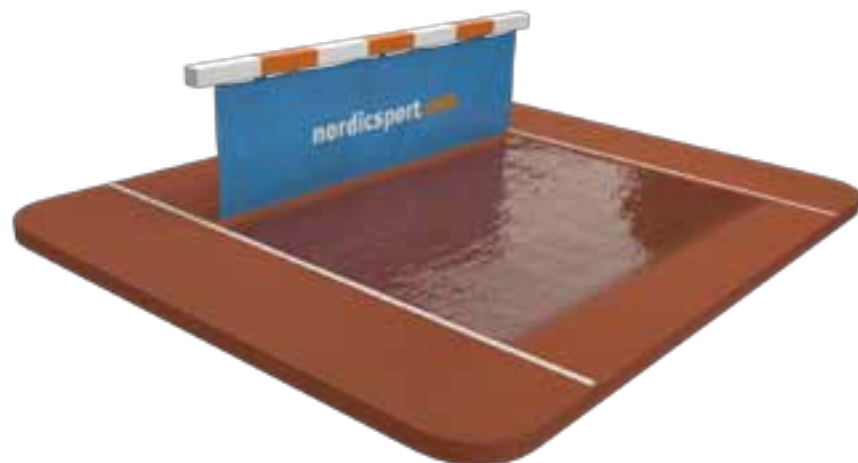

art 1126446

Hurdle cart sideloaded 40

Steel cart with capacity of 40 hurdles. Four racks on each side for easy loading and unloading. Made from a strong steel frame with sliding rails for hurdles.

art 1126460

Splash guard

Fabric splash guard to be placed under water jump hurdle 1126 430.

art 1126433

Running

Aluminium curbing

Curbing made of light-weight natural anodized aluminium. Precision and quality guarantees easy installation and maintenance. It will fit your track perfect. Easy to complement. IAAF certified no E-01-0323.

art 1100100

Relay batons aluminium

Set of eight relay batons of anodized aluminium. IAAF certified E-13-0772

art 1111409

Relay Baton Plastic

Set of eight relay batons made of plastic.

art 1111410

Timer's stand

Timer's stand made of aluminium with 8 seats. Can easily be folded to use minimum space when storing. Fitted with wheels for easy transportation. Complete with detachable signal board.

art 1156420

Winner's stand

Winner's stand for three persons. With a sturdy under structure of painted steel profile and wooden platforms.

art 1156424

Winner's platform

A big winner's stand for 12 persons. Otherwise the same as 1156 424.

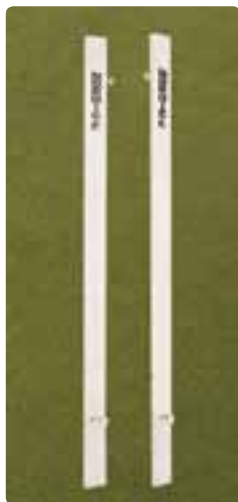

art 1157424.

Lap counter with bell

A sturdy lap counter with a frame of zinc plated steel tubes. Two cassettes with black figures. Includes a brass bell with a sonorous ringing. The lap counter is easy to transport on its two wheels.

art 1130290

Finish line posts

Sturdy white-painted posts of aluminium. Complete with ground sockets with lids. Height 137 cm.

art 1110409

Linesman's flags, red

Plastic handle with a nylon flag.

art 1010084

Linesman's flags, white

art 1010085

Linesman's flags, yellow

art 1010094

Electronic lap counter

Electronic lap counter with both a single-sided or three-sided two-digit model. Digit height 25 cm. Complete with control panel and bell.

art 1130291

Timing & Control devices

Reac time

Nordic Sport ReactTime® can be used as both false start and for training athletes reaction time to start signal. The world's top sprinters have shown that reaction times can be improved by training – and ReactTime® can be the cornerstone of that training process.

art 1153201

False Start System:

Detects illegal reaction time of athletes in sprinting events and signals a false start to the starter as described in IAAF Rule 162.10. Measures reaction times to 1/1000th of a second. Battery operated and rechargeable, or AC powered. Includes all required cables as well as headset for the starter. Optional loudspeakers in the blocks assure that all athletes hear the starter's commands or the sound of the gun simultaneously. Included software allows the power waveforms for all the athletes in a race to be graphed, compared, saved and printed. Optional paper tape printer allows reaction times of the athletes to be printed trackside for each race.

Training System:

Can be operated with a firing a gun or with the software's speaker option and. The software allows starter's commands to be personally recorded with their own voice. Two Personal Training Systems can be linked for competitive training. Can be connected to photobeams or a Nordic Sport Lynx system for total sprint timing. Data from your entire workout, including power waveforms, can be stored in the unit and retrieved later on your own PC using the software. Starting block, computer and speakers are bought separately

Photo Finish System

Nordic Sport Lynx is the world's most popular and versatile digital photofinish and timing system in its price class. The Photo-finish camera is a completely automatic timing system with a digital camera. Nordic Sport Lynx is an IAAF certified product.

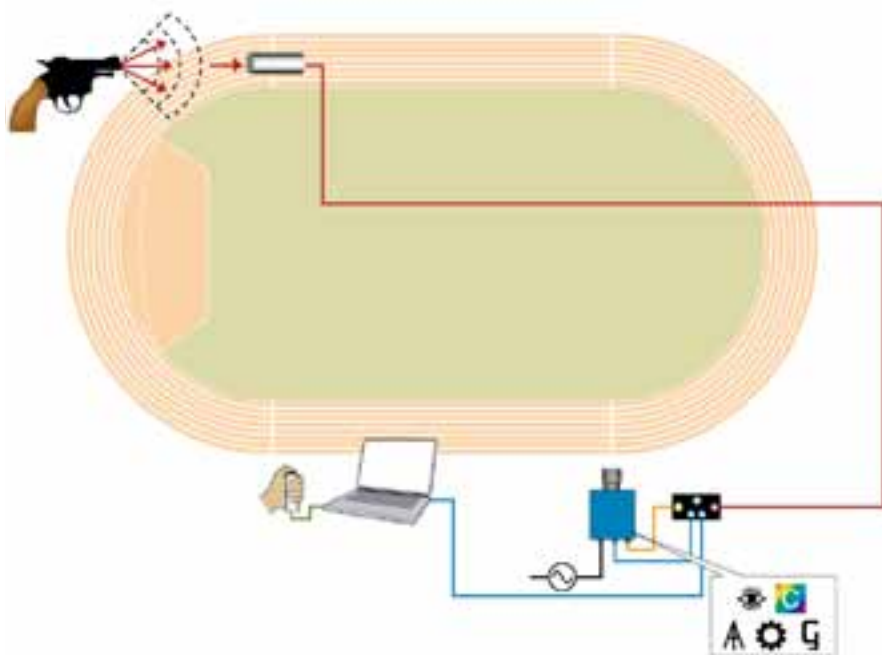

The Photo-finish camera takes from 1000 photos/second to 2000 photos/second depending on which packet you choose. The Photo-finish camera can produce photo-finish images in black and white or colour, depending on the choice of packet. The program included in the packet is in 40 different languages.

There are three different packets to choose from: Competition, Championship and Grand Prix (see detailed description on next page). If there is anything you wish to alter or add, all of our packets can be modified. There are many options. For example scoreboards, wind meters, lap counters, extra cameras, etc. You can also send your results "live" to TV, Internet, etc.

We at Nordic Sport can always customise a system for your requirements, large or small.

art 1153102

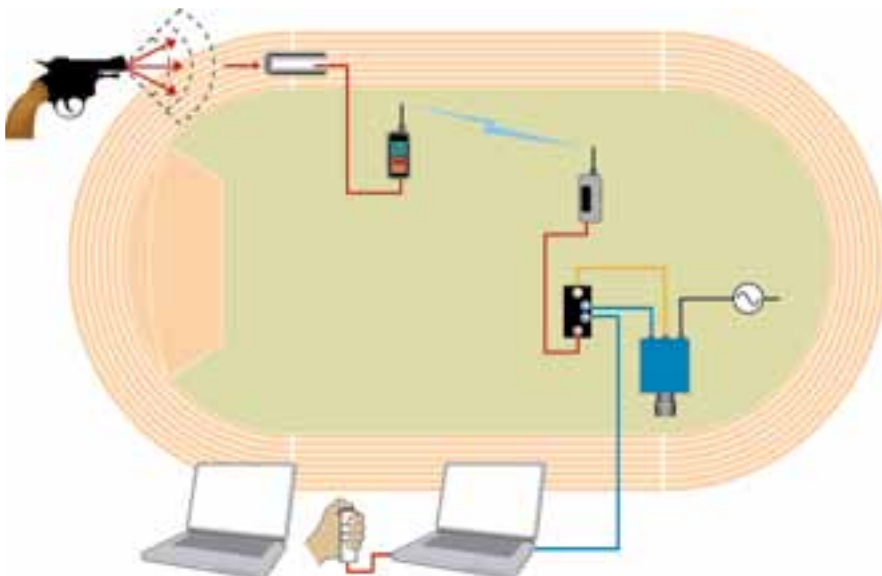

Lynx Competition

- Camera: EtherLynx 2000, fully upgradeable 1000 frames/second, timing enabled, c-mount f1.2 12.5–76 mm zoom lens.
- Automatic start detection sensor.
- Complete professional tripod and mounting hardware with precision adjustment.
- All-inclusive camera and start cable set.
- Built-in interface to scoreboards and wind gauges.
- FinishLynx 32 – Multi language Photo Finish software.
- LynxPad – Multi language Event Management software, available in Swedish and several other languages.
- Also available as "Competition Elite" with wireless communication from the start microphone.

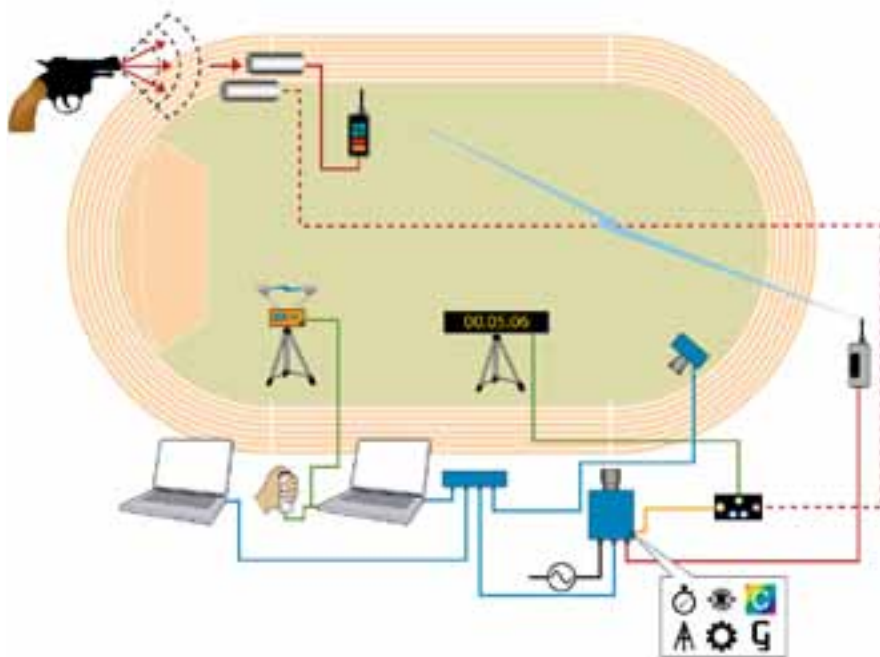

art 1153011.

Lynx Competition Elite

- Camera: EtherLynx 2000, fully upgradeable 1000 frames/second, timing enabled, c-mount f1.2 12.5–76 mm zoom lens.
- F-mount(Nikon compatible) through-the-lens alignment viewer and remote iris control.
- Nikon-compatible 24-70 mm f2.8 zoom lens.
- IAAF Compliant RadioLynx Wireless Start Detection System.
- Automatic start detection sensor.
- Complete professional tripod and mounting hardware with precision adjustment.
- All-inclusive camera and start cable set.
- Built-in interface to scoreboards and wind gauges.
- FinishLynx 32 – Multi language Photo Finish software.
- LynxPad – Multi language Event Management software, available in Swedish and several other languages.
- Also available as "Competition Elite" with wireless communication from the start microphone.

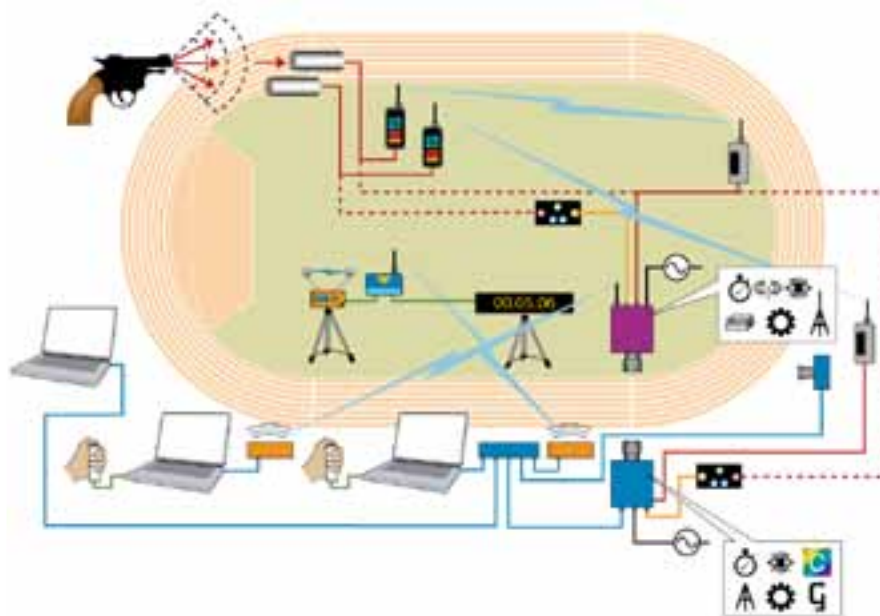

art 1153012

Lynx Championship

- Primary camera - fully upgradeable 1000 frames/second, timing enabled, color EtherLynx 2000.
- Nikon normal AF Nikko 50 mm f/1.8 lens, with f-mount through-the-lens alignment viewer with remote iris control.
- Reverse angle camera- fully upgradeable 1000 frames/second monochrome EtherLynx 2000 with c-mount motorized remote control zoom lens.
- Complete professional tripod and mounting hardware with precision adjustment for both cameras.
- All-inclusive camera and start cable sets.
- Built-in interface to scoreboards and wind gauge.
- FinishLynx 32 - Multi language Photo Finish software.
- LynxPad - Multi language event management software.
- Remote control camera positioning platform.
- IAAF compliant wireless start detection system.
- IAAF compliant Ultrasonic wind gauge.

art 1153013.

Lynx Grand Prix

- Primary camera: color EtherLynx PRO, 2000 frames/second, timing enabled.
- Nikon normal AF Nikko 50 mm f/1.8 lens, f-mount through-the-lens alignment viewer with remote iris control.
- Wireless connectivity option for EtherLynx PRO.
- Backup/Reverse angle camera: color EtherLynx 2000, fully upgradeable 1000 frames/second, timing enabled.
- F-mount through-the-lens alignment viewer 28 mm-105 mm f/2.8 zoom lens.
- Complete professional tripod and mounting hardware with precision adjustment for both cameras.
- All-inclusive camera and start cable sets.
- Built-in interface to scoreboards and wind gauges.
- FinishLynx 32 - Multi language Photo Finish software
- LynxPad - Multi language Event Management software.
- Remote control camera positioning platform.
- IAAF compliant wireless start detection system.
- IAAF compliant Ultrasonic wind gauge.
- 9-digit alphanumeric scoreboard/running time clock and tripod.
- Automatic race-image capture software plugin that also operates as a photocell to control the running time clock at the finish line.
- AirLynx Wireless infrastructure for secure and reliable communication with EtherLynx PRO camera and other Lynx devices (i.e. included ultrasonic wind gauge)
- Amplified antenna for 802.11g wireless network.

art 1153015

Manual scoreboard

A revolving scoreboard mounted on a steel frame with wheels. 8 cassettes for numbers showing attempt, athletes number and result.

art 1156430

Cassette red 0-9

art 1010099

1. Accusplit Pro Survivor

Extra large display with 12/24 hrs clock. Functions: Alarm, start/stop/split. 24 hrs stopwatch. Daily alarm. Month/Date/Day.

art 1154601

2. Accusplit Survivor II

Same functions as Pro Survivor, but no weekday and smaller display.

art 1154600

3. Accusplit Eagle

Stopwatch with automatic memory for the last 100 lap or cumulative splits. Alarm for exceeding memory. 10 hrs register and memory function. Rapid Split Action. Frequency indication. Dual displays with continuous information. Indicator for battery status. Water and shock proof.

art 1154602

Seiko system watch w printer

Features include: Time/Calendar showing year, date, hours minutes and seconds. Chronograph measuring down to 1/100 second. Up to 100 lap and partial times can be measured, stored in memory and recalled. Measured data can be printed out on printer. Autostart; by pre-setting measurement start time, the chronograph can start automatically at a desired point in time.

art 1154129

Paper roll for 1154129

art 1154130

Wind gauge Lynx

The Lynx Ultrasonic Wind Gauge is an affordable anemometer that utilizes IAAF-approved ultrasonic technology to provide accurate wind speed and direction data. The unit is a FinishLynx accessory that connects directly to an EtherLynx Camera, Connection Box, SerialLynx unit, or computer serial port. This allows live wind gauge data to integrate seamlessly with FinishLynx.

art 1153010

Laserlynx

Laserlynx is a powerful laser-based measuring device linked to a palm hand-held computer. The resulting product is in a class by itself. Never has a distance measurement in a track and field environment been so accurate, easy and so affordable. All the measurements are computer generated and information can be shared effortlessly with scoreboards, infield displays, databases and even with announcers.

art 1153104.

Electronic scale 0.1 g

Official competition rules allows only 1 gram deviation in weight of throwing implements. Only electronic scales can meet these demands. This scale weighs up to 8.1 kg with only 0.1 gram deviation to cover all areas of throwing.

art 7971500

Electronic scale 1.0 g

Same as 7971 500 but with 1.0 g deviation.

art 7971501.

Wind gauge Springco Compact

A small accurate windgauge. Tripod included.

art 1150350

Budget Scale

Weighs 12kg +/- 1.0g.

art 7971502.....690 kr

1. Javelin control device

From Nordic Sport, the best javelin control device available. All dimensions of the javelin can be checked: measures, centre of gravity etc. Made of aluminium. Complete with electronic sliding caliper and bag. Combine the javelin control device with the electronic scale for a complete system of measurement.

art 7900462

Used at

2. Discus gauge 1.75-2 kg

The same gauge as 6161 461 but for size control of discus 1.75 and 2.0 kg

art 6161462

3. Discus gauge 1-1.5 kg

Test ruler with permanent checkpoints for maximum and minimum diameter, rim radius, thickness and centre plate diameter. Made of steel. For discus 1.0 and 1.5 kg.

art 6161461

4. Sliding caliper

Top quality big-size sliding caliper for exact control of all throwing appliances.

art 6161463

Measuring devices for throws

Measuring device for throw events.

Comes in nylon bag with:

- Measuring device javelin
- Measuring device shot/hammer
- Measuring device discus
- Centre of gravity device

art 7900464

Measuring long/triple jump

An instrument that provides accurate measuring. Eliminates errors caused by sliding sand.

art 2105240

Measuring device pole vault

Made of aluminium. Adjustable upper part with an angle mounted on top. Makes the reading easy and 100 % accurate. Measures 300-620 cm.

Throwing cages

Hammer cage Alu IAAF

One of the worlds safest hammer cages. It is simple and fast to change opening for right or left hand throwers. Fulfills all international and national requirements. IAAF certified nr E-00-0238

- height 8 m, gate height 10.5 m
- WITH ANCHORS, pillars screwed to anchors embedded in concrete
- independent aluminium pillars, fast and safe cage installation
- INCLUDING NET, tightening system based on steel wires and hooks, durable and elastic net with proper absorption of impact energy
- very easy to assemble and dismant, simple operation

- high reliability
- anchors without spaces for accumulating water, equipped with hinges for connecting pillars and putting them in the upright position
- corrosion proof
- possible of covering anchors with synthetic surface
- light aluminium construction easy to install without cranes
- high reliability and easy operating.

art 5121467NS.

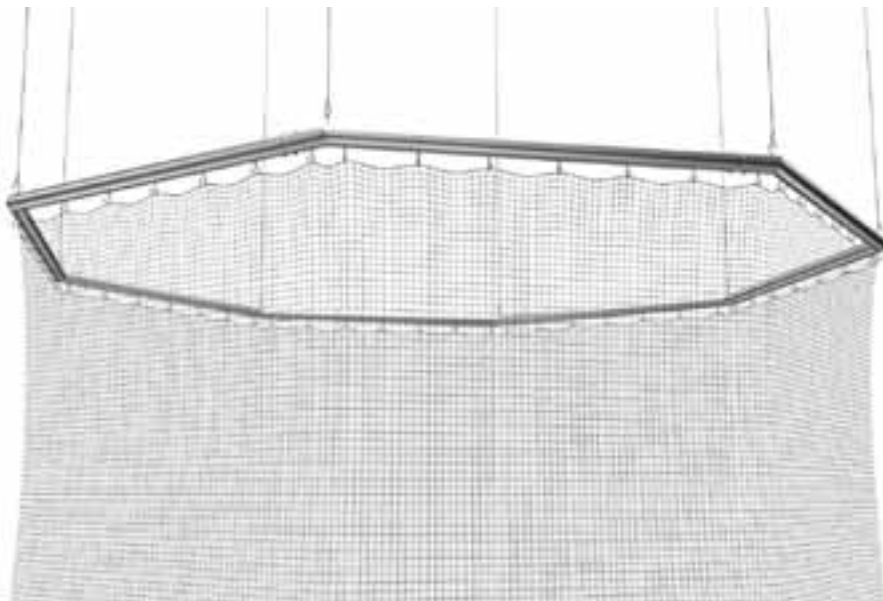

Hammer cage Steel IAAF

Same as Hammer cage Alu IAAF, but with steel construction. Certified by IAAF no E-00-0238

art 5121467M.

Throwing cage indoors

Indoor throwing cage. Made of strong aluminum. Net and canvas included (7990202).

art 5121475.

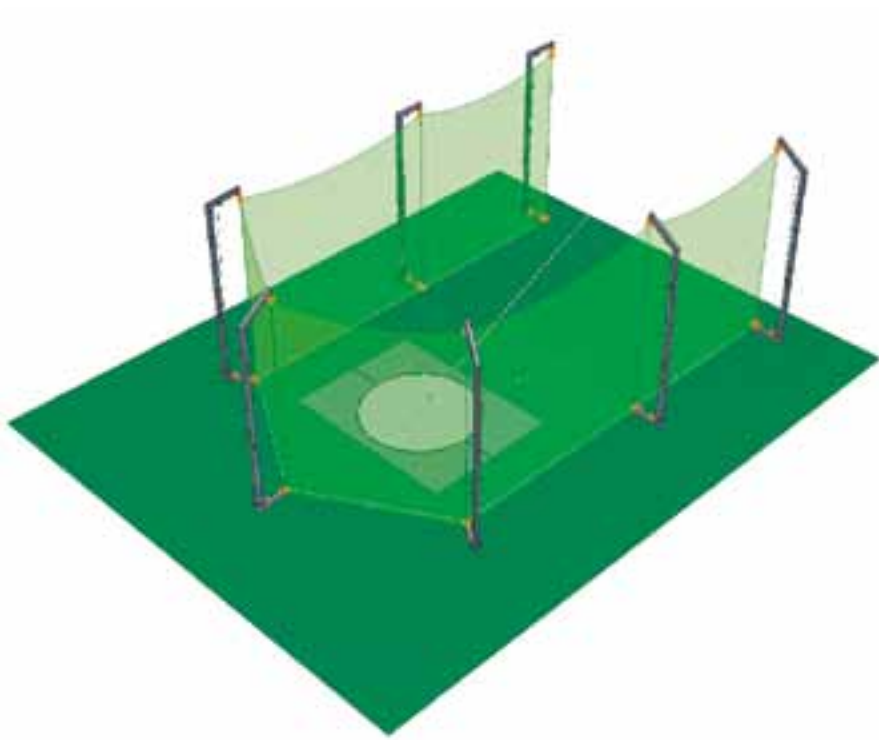

Winch for indoor cage

Winch for our indoor throwing cage. Helps you to easy raise and lower the net on the indoor throwing cage.

art 5121479.

Discus cage

Simple training cage with opportunity to assemble everywhere. It's fast and simple to assemble or disassemble and move the cage.

art 6161000.

Net for throwing sector

Marks boundary of throwing sector. 70m long and 50 cm high. 35 netholders included.

art 7970002.

Throwing equipment

Implement retriever Radio

Made a great success during European Championship in Gothenburg and World Championships in Helsinki, Athens and Edmonton. 1240x550x770 mm. With place for 3 javelins, 6 discuses and 2 shots or hammers. Strong chassis with servo-control. Working time 90 min/charging. Operation control with a 4-channel transmitter and receiver. At disturbance in the radio control the wagon will stop immediately. art 7971100.

Hammer cart

Powder-coated steel hammer rack with wheels. Designed for 12 hammers. art 5120470

Used at

Javelin cart

Powder-coated steel javelin rack with wheels. Designed for 18 javelins. art 5120465

Used at

Shot put cart

Powder-coated steel shot put rack with wheels. Designed for 15 shots.

art 5120480

Used at

Discus cart

Powder-coated steel discus rack with wheels. Designed for 28 discus.

art 5120475

Used at

Athletics shelter mobile

A robust, flexible solution for seating at your arena where athletes get protection from sun and rain.

Made of sturdy steel profile with ribbed roof cladding. Adjustable height and with 8 seats. Collapsible wheel for easier transport is mounted underneath.

art 2300010

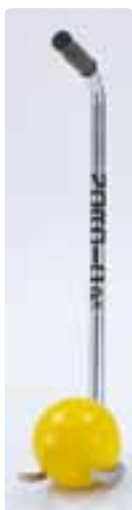

Shot channel

Strong profile with steel frame for return carriage of shots during competition.

art 5140858

Used at

Shot lift

Practical device for lifting the shot from the ground.

art 5140266

Wind indicator

Wind sock on a steel stand.

art 1150317

Used at

Discus bag big

Made of strong plastic with a ziplock

art 6125201

Discus bag small

Made of strong plastic with a ziplock.

art 6125101

Throwing markers

Set on 10 pce of markert with stand included

art 7971475

Competition markers

Set of 13 competition markers and one small gold coloured flag. Made of steel.

art 7971469

Magnesium holder

Good looking magnesium holder.

art 1090499

Wire for protective net

art 7971000

Sector lines PVC White

Sector lines made of same strong PVC material as we use in our raincovers for landing pits. 50 mm wide shipped in 100m rolls. Extra white color.
art 7971472

Used at

Sector lines PVC Yellow

Sector lines made of same strong PVC material as we use in our raincovers for landing pits. 50 mm wide shipped in 100m rolls. Extra yellow color.

Sector lines PVC Red

Sector lines made of same strong PVC material as we use in our raincovers for landing pits. 50 mm wide shipped in 100m rolls. Extra red color.
art 7971474

Used at

Sector line Plus

Of soft plastic material. Width 50 mm. Delivered in rolls of 1100 m.
art 7971465

Sector line Plastic

Made of plastic width: 50 mm. Delivered in rolls of 40 m. Cart is not included. Price per meter
art 7971463

Cart for sector lines

Cart with roll and crank for easy handling of 80 m sector lines.
art 7971467

Distance marker Elite set 95 m

Set of 7 pcs distance markers with 35, 45, 55, 65, 75, 85 and 95 m. Brand new distance marker, further development of our distance marker Super. Made from polyethylene, making cube both elastic and strong. Now with a handle for better stacking to avoid a vacuum lock. The cube weighing 2 kg each and is 63 cm high.

art 1109416

Used at

Distance marker Elite set 90 m

Set of 7 pcs distance markers with 30, 40, 50, 60, 70, 80 and 90 m.

art 1109415

Distance marker Elite set 22 m

Set of 5 pcs distance markers with 14, 16, 18, 20 and 22 m.

art 1109417

Used at

Distance Marker Plus 10-22 m

Set of 7 pcs distance markers with 10, 12, 14, 16, 18, 20 and 22 m. Brand new distance marker. Made off strong anodized aluminum, making marker both elastic, strong and rust free. V shape for better stacking. 35cm high and 30cm wide.

art 1109427

Lätta att stapla

Distance Marker Plus 30-90 m

Set of 7 pcs distance markers with 30, 40, 50, 60, 70, 80 and 90 m. Brand new distance marker. Made off strong anodized aluminum, making marker both elastic, strong and rust free. V shape for better stacking. 35cm high and 30cm wide.

art 1109425

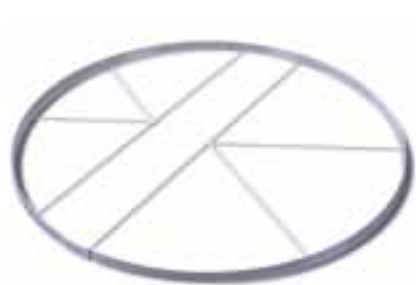

Distance Marker Plus 35-95m

Set of 7 pcs distance markers with 35, 45, 55, 65, 75, 85 and 95 m. Brand new distance marker. Made off strong anodized aluminum, making marker both elastic, strong and rust free. V shape for better stacking. 35cm high and 30cm wide.

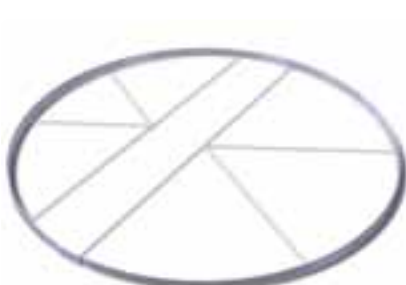

art 1109426

Hammer circle

Hammer circle of steel for embedment. IAAF certified no E-99-0012.

art 5121458

Discus circle

Discus circle of steel for embedment. IAAF certified no E-99-0014.

art 6160452

Shot put circle

A shot put circle of steel for embedment. IAAF certified no E-99-0013.

art 5140454

Hammer concentric circle

Wooden segments quickly convert your pre-existing, already set discus ring into a hammer ring. The IAAF recommends one throwing circle for both hammer and discus events with the use of a conversion circle.

art 5121462

Wooden toe-board

Toe-board made of white painted slow growing hard pine wood.

art 5140265

Net for throwing sector

Marks boundary of throwing sector. 70m long and 50 cm high. 35 netholders included.

art 7970002.

Protection throwing circles

Protection cover for throwing circles made of fibreglass.

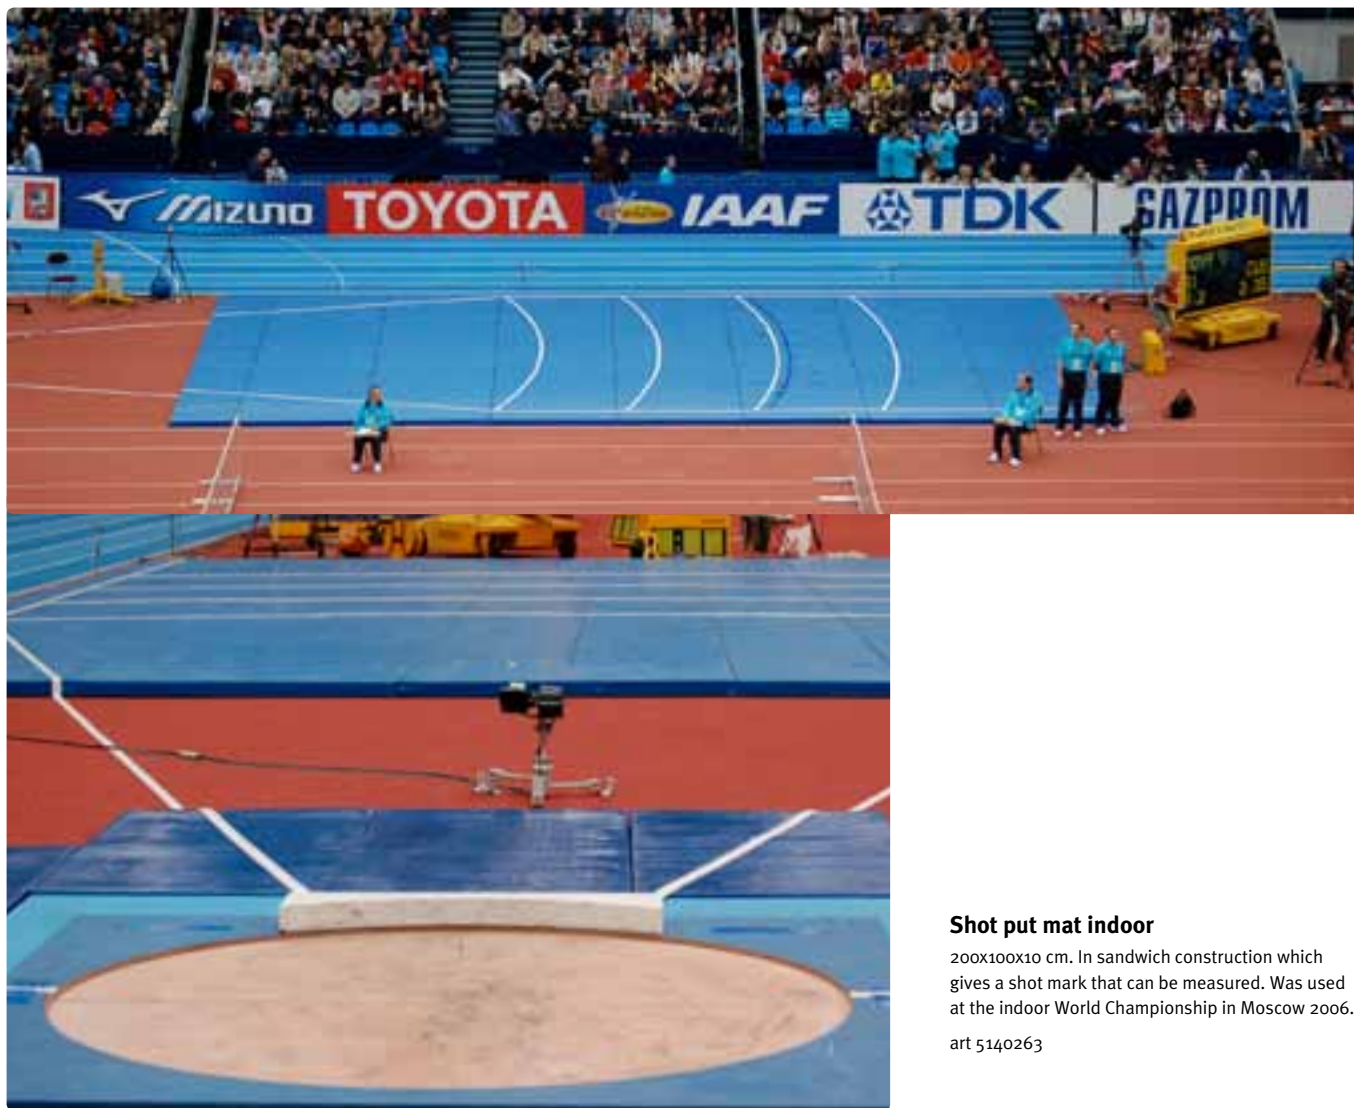

art 5121470.

Sector flag

For marking the length of the sectors. Made of steel.

art 7971461

Shot put mat indoor

200x100x10 cm. In sandwich construction which gives a shot mark that can be measured. Was used at the indoor World Championship in Moscow 2006.
art 5140263

Shot put circle indoor

Moveable shot put circle with toe board of fibreglass, provided with handles. Filled with laminated wood which has been surface treated to avoid slipperiness. Diameter 2,135 m, inside 1,4 – 2,6 cm under the circle's upper edge according to IAAF's regulations.
art 5140455

Training accessories

1. OFFER (QUOTATION)

A. Period of validity

An offer is valid for one month from the date of the offer for delivery within 3 months from the date of the offer, unless otherwise stated.

B. Deviations from offer

If the purchaser makes exceptions or changes in the offer, Nordic Sport retains the right to make a new agreement concerning conditions of sale.

2. ORDER

An order is considered as a collected reservation for delivery to an address on one and the same occasion and with one invoice.

A. This is where you make your order

The order can be made directly to Nordic Sport's offices or representatives, verbally or in writing. Once the request has been received, confirmation can be made via written order confirmation.

3. CONDITIONS

A. General

As a basis for invoicing and discounting, the price at the time of delivery applies, excl. VAT, order costs, charges, freight, packaging and insurance costs.

B. When offering

Offered prices, that shall normally be fixed during the validity of the offer, are net excl. VAT order costs, charges, freight, packaging and insurance costs.

If, during the offer's validity period, changes of exchange rates, changes of raw material and import prices or other price changes that are outside the control of Nordic Sports influence and control occur, then Nordic Sport retains the right to make corresponding adjustments to the offered price.

4. CONDITIONS OF PAYMENT

Payment shall be made within 10 days net, alternatively C.O.D, and is calculated, unless otherwise stated, from the invoice date. If payment is not made within the stated time, Nordic Sport will charge interest in accordance with a rate of interest that is adapted to the actual rate of interest which is also stated on the invoice.

5. DELIVERY

A. Delivery time

Delivery will be made directly unless otherwise stated.

B. Reception of goods

If items are missing this shall be stated on the freight note before acknowledging delivery. Delivered goods shall be immediately placed in an area with normal heating and air humidity by the recipient, unless otherwise stated.

C. Damage

Delivered goods shall be immediately inspected on reception. The purchaser shall, within 7 days, report any transport damage to the transporting company.

Note: goods damaged in transport shall not normally be returned to Nordic Sport. If the goods are such that require assembly and the purchaser and Nordic Sport

are in agreement concerning assembly, the inspection shall be performed either directly after reception or if the goods have been put aside for assembly, immediately after unpacking.

D. Claims

Claims must always be made within 14 days after the good's stamping date in order for the receiver to make a claim.

Note: goods that have been claimed by the receiver may only be returned after approval from Nordic Sport's offices.

Comments concerning completed deliveries shall be made in writing to Nordic Sport within 30 days, where of a maximum of 10 % of the invoiced sum may be withheld until the delivery has been approved. Full payment shall however always be made within 90 days after the invoice date.

E. Returns

Independent of the reason for returning goods, returns are only allowed after agreement with a representative from the office in question, who will also explain how the return shall be handled. Returned goods shall always contain a list of the returned items, or a completed return slip from one of our offices.

All returned goods shall be sent via Schenker as freight goods or alternatively via Schenker as parcel or post packet.

Returns due to faults caused by the purchaser can only be approved for undamaged goods in their original packaging. For such returns, the purchaser will be charged 20 % of the value of the goods. Freight and packaging costs shall be paid by the purchaser.

F. Force Majeure etc.

Hindrances for complete delivery caused by war, fire, or other force majeure, cessation of work, lack of workforce, shortage of raw materials, delays from subcontractors, measures from the state or other similar situations outside Nordic Sport's control, entitle Nordic Sport to necessary lengthening of the delivery time. If hindrances that occur make it impossible to complete a delivery or in an essential way complicate it, then Nordic Sport are released from the need to complete the same. For deliveries that due to the above have been delayed or omitted, Nordic Sport retains the right to be free from responsibility.

6. ADMINISTRATION CHARGES

Are charged according to the following conditions:

Written order and telephone order: 25 sek for order values up to 500 sek exclusive VAT. With order values exceeding 500 kr there will be no administrative charge.

7. PALLET CHARGE

For palletted deliveries, a charge of 110 sek per normal pallet, 160 sek per long pallet, 1,500 sek per steel pallet and 4,000 sek per steel cage will be forwarded to the purchaser. Steel pallet and steel cage costs will be credited when returned to Nordic Sport.

8. ASSEMBLY

If assembly is included, any alteration work is charged as extra. The purchaser shall make sure that there is sufficient electrical power and lighting in the premises in

question and that these have been prepared, since connection of high voltage power and water & waste units is not included in Nordic Sport's undertaking. If assembly cannot be concluded in a complete sequence and this is not due to Nordic Sport, then Nordic Sport has the right to charge for any extra journeys and associated other costs.

Once the assembly has been completed, the purchaser shall inspect the performed work. Any criticism shall be made immediately and then be confirmed in writing. Assembly is performed by Nordic Sport's fitters to an offered price.

The fitters work only in accordance with assembly instructions from Nordic Sport and may not, without written agreement between the purchaser and Nordic Sport, perform work that deviates from the instructions.

9. GUARANTEE

For manufacturing and material faults, Nordic Sport leaves a guarantee, which comprises 1 years guarantee counted from the day of delivery, assuming that the goods have been placed in a suitable premises.

The guarantee means that Nordic Sport is responsible for deciding if the goods should be repaired or replaced.

Damage during transport, when unloading, unpacking, carrying and placing and through unsuitable handling, is not the responsibility of Nordic Sport.

10. OWNERSHIP

Proposals, sketches, constructions, drawings and other offer documents are Nordic Sport's property and may not, without specific agreement, be used by the purchaser or be passed on to a third party.

11. VIEWING DELIVERY

After agreement, certain items can be delivered for viewing. Viewing items are invoiced on delivery. If the items are not returned within two weeks from date of delivery, they are assumed to have been ordered. If the items are returned within the stated time, the customer will be credited with the invoiced amount.

12. MODEL ALTERATIONS

Nordic Sport retain the right to alterations of models and designs.

13. SPECIAL CONDITIONS

In cases of fitting contracting, a general mutual contract is used, based on AB 72 (general conditions for building, plant and installation contracts from 1972, Svenska Teknologiföreningen, form 20:72) with additions and alterations.

Nordic Sport are not responsible for printing errors or products that are sold out.
